

Rangahau te Korou o te Ora / Quality of Life Survey 2024

Tāmaki Makaurau/Auckland report | April 2025

Acknowledgements

Large-scale and complex research projects such as this require a combined effort. This project was undertaken by Ipsos New Zealand on behalf of the nine participating councils. A project team from four councils managed the project and worked closely with representatives from Ipsos throughout this project. The members of the Quality of Life project team were:

- Alison Reid, Trudie Cain and Ashleigh Prakash, Auckland Council
- Kath Jamieson, Christchurch City Council
- Marcus Downs, Wellington City Council
- Alix de Blic, Dunedin City Council

The team at Ipsos who worked on this project included Amanda Dudding, Kania Sugandi, Hanrie Le Roux, Arabella Wiles, Heni Tupe, and Neil Tee.

Trudie Cain and Ashleigh Prakash at Auckland Council prepared this Auckland-specific report, with support from Ipsos who prepared the charts.

Highlights

The Quality of Life Project is a partnership between nine New Zealand councils. It measures urban residents' wellbeing and their perceptions of living in large urban areas. This report presents results from the 2524 Auckland respondents who took part in the 2024 survey.

NB: **Green** denotes generally positive results while **red** denotes less positive results.

Overall Quality of Life

75% of Aucklanders rated their overall quality of life **positively**

Percentage who said their quality of life changed compared to **12 months prior**

25% said their quality of life **increased**

30% said their quality of life **decreased**

Top-3 reasons for quality of life ...

Increasing

- 1 Healthcare and wellbeing
- 2 Financial wellbeing
- 3 Lifestyle

Decreasing

- 1 Reduced financial wellbeing
- 2 Reduced healthcare and wellbeing
- 3 Work related

Housing

31% agreed their **housing costs were affordable**

72% agreed their **home suited their needs**

73% agreed their **neighbourhood suited their needs**

Economic Wellbeing

Two thirds (66%) of the Auckland respondents were in paid employment either full-time or part-time. Among this group:

55% were **satisfied** with their work-life balance

22% were **dissatisfied** with their work-life balance

The most common reasons provided for work-life balance being ...

Satisfactory

- 1 Workload and manageable hours
- 2 Time management
- 3 Work allows flexibility

Dissatisfactory

- 1 Workload and hours
- 2 Insufficient income
- 3 Not enough time for self and others

33% had **enough or more than enough money** to meet their everyday needs

22% **did not have enough money to meet their everyday needs**

37% were **worried** about their financial circumstances

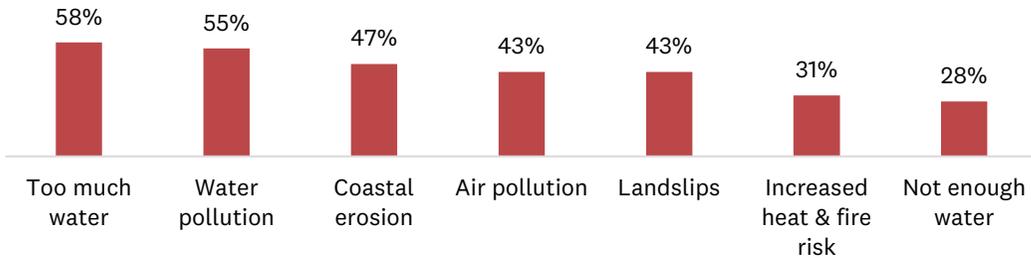

58% **could pay an unexpected \$2000 bill** within a week and without going into debt

Highlights

Natural Environment and Climate Change

Percentage who said each environmental issue had been a **problem** in their local area **in the last 12 months**

37% **were worried or very worried** about the impacts of climate change for Auckland and Auckland residents

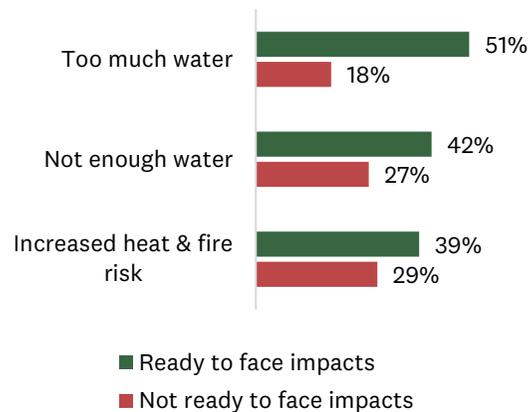

17% **were not at all worried**

60% felt they **understood** potential future impacts of climate change for Auckland

31% **felt they did not understand climate change and its potential impacts**

Percentage who said they and their household felt **ready** or **not ready** to face the impacts of:

Built Environment

72% said their local area is a **great place to live**

57% **were happy** with the look and feel of their local area

Percentage who said their local area had changed compared to **12 months ago**

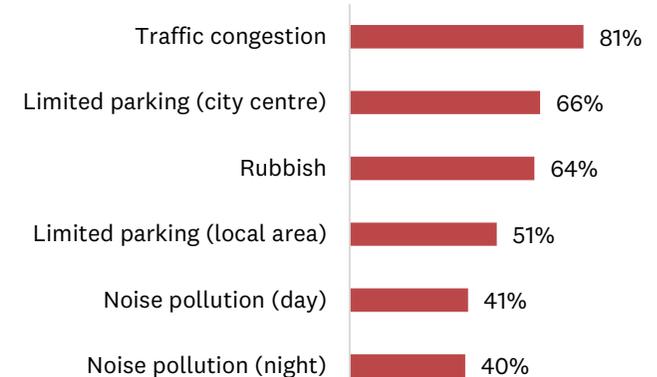

15% said their local area became **better**

33% said their local area became **worse**

Percentage who said each issue had been a **problem** in their local area or city centre **in the last 12 months**

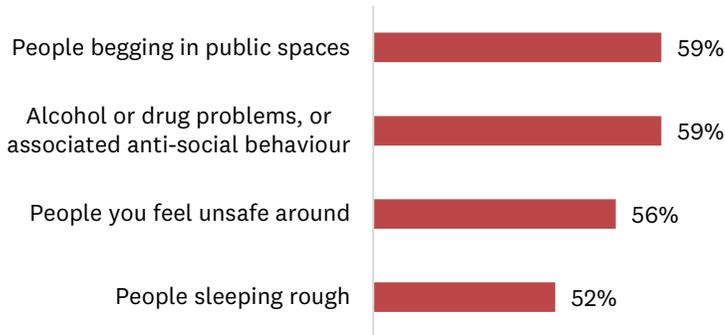

Highlights

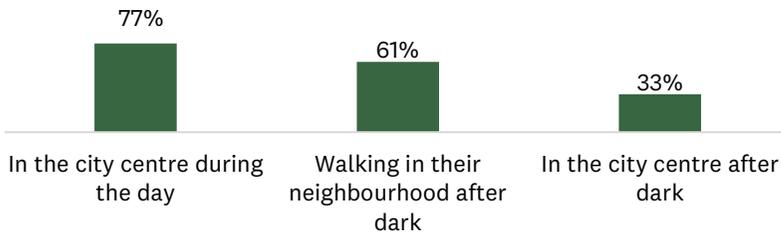

Local Issues

Percentage who said each issue had been a **social issue** in their local area **in the last 12 months**

Perceptions of safety – percentage who felt **safe** ...

Percentage who said each crime and safety-related issue had been a **problem** in their local area **in the previous 12 months**

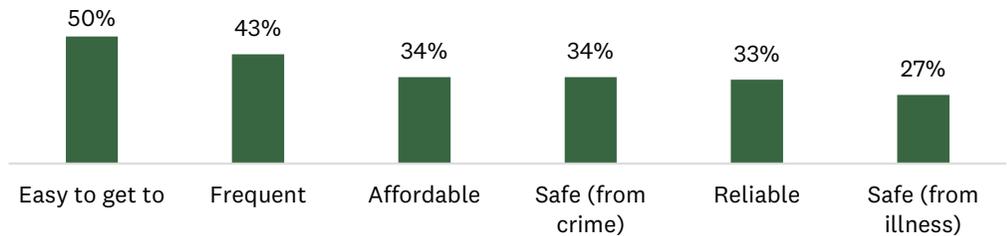

Transport

66% had **used** public transport in the last 12 months

31% had not used public transport in Auckland in the last 12 months

Perceptions of public transport – percentage who agreed public transport is ...

29% felt it was **easy to get to places without using a private vehicle**

31% thought public transport was a **practical alternative to driving**

25% agreed their **local bike network was safe**

Council Processes

29% were **confident** in Auckland Council decision-making

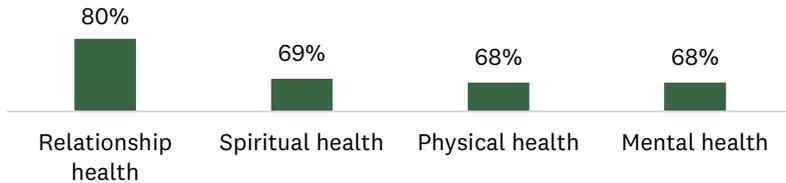

34% believed the **public has influence over council's decisions**

Highlights

Health

Percentage who self-rated each domain of health as **good, very good, or excellent** ...

29% said they had **always or most of the time felt stressed** in the last 12 months

86% said they had access to **practical support** and 85% had access to **emotional support**, in the event of a serious illness / injury

Culture and Identity

67% felt **other Aucklanders accepted and valued them**

23% said they had **experienced anger or prejudice from others** in their local area in the last 3 months

70% agreed they could **participate in, perform, or attend activities that aligned with their culture**

45% thought **racism and discrimination towards others had been a problem** in their local area in the last 12 months

Community and Social Wellbeing

61% agreed it was important to them to feel a sense of community with others in their neighbourhood

... but only 42% felt this sense of community with others

16% said they had **always or most of the time felt lonely** in the last 12 months

73% said they **participated in at least one type of social network or group** in the last 12 months

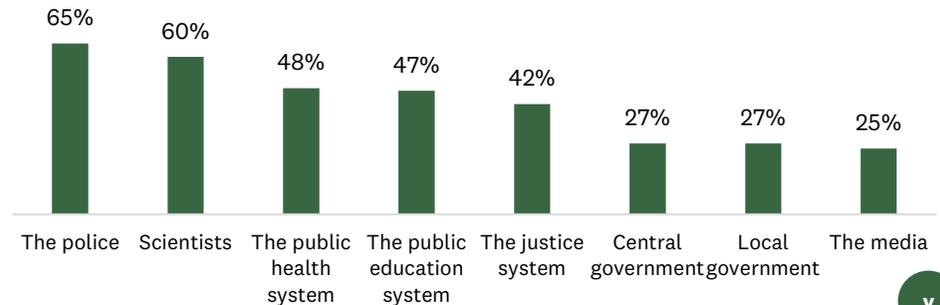

Top-3 formal social networks

- 1 Hobby / interest groups
- 2 Professional / work networks
- 3 Group fitness / movement

53% said they **trusted** other people in their local area

Percentage who said they **trusted** each of the following institutions in New Zealand:

Background

Rangahau te Korou o te Ora / The Quality of Life Project is a collaborative local government research project in Aotearoa New Zealand.

The project was established over 20 years ago, in response to the impacts of urbanisation on the wellbeing of New Zealand residents and communities. The primary objective of the study is to measure urban residents' wellbeing and their perceptions of living in large urban areas, through a survey undertaken once every two years.

The survey provides data for councils across the country to use as part of their monitoring programmes, and to make important decisions that aim to improve life for residents and communities.

It also contributes to public knowledge and research on wellbeing issues in New Zealand.

The 2024 survey measures residents' perceptions and experiences across several domains, including:

Overall Quality of Life

Housing

Health & Wellbeing

Natural Environment & Climate Change

Community & Social Wellbeing

Built Environment

Culture & Identity

Local Issues

Employment & Economic Wellbeing

Transport

Council Processes

Councils involved

The number of participating councils varies each time. In 2024, nine councils participated in the Quality of Life survey:

- ▶ Auckland Council
- ▶ Hamilton City Council
- ▶ Tauranga City Council
- ▶ Hutt City Council
- ▶ Porirua City Council
- ▶ Wellington City Council
- ▶ Christchurch City Council
- ▶ Dunedin City Council
- ▶ Waikato Regional Council.

The Auckland region includes several smaller towns, rural, and semi-rural areas. However, over 90 per cent of the Auckland population lives in the urban area.

Project management

Since 2012, the Quality of Life Project has been managed by a group comprising representatives from the following four councils:

- ▶ Auckland Council
- ▶ Wellington City Council
- ▶ Christchurch City Council
- ▶ Dunedin City Council.

The Quality of Life project team manages the project on behalf of all participating councils. This includes commissioning an independent research company and working closely with the company.

Ipsos New Zealand was commissioned to undertake the 2024 survey on behalf of the participating councils.

Quality of Life survey results are available on the Quality of Life website: <https://www.qualityoflifeproject.govt.nz/>

Method and sampling overview

Method

A different research method was used in 2024. From 2012 to 2022, the New Zealand Electoral Roll was used to sample and invite residents to participate in the Quality of Life survey. However, falling response rates, poor community reach, and increasing postage costs reduced the effectiveness of this method over time.

In 2024, the survey moved to a combined method using online panels, recontacts from the 2022 Quality of Life survey, and face-to-face (F2F) intercept interviewing. Auckland Council's People's Panel* was also used to supplement Auckland responses.

Dates of fieldwork: Fieldwork took place from 23 April to 31 July 2024. Online panel fieldwork took place first (23 April–19 May), with the recontacts and People's Panellists invited partway through (7–19 May). This was followed by the F2F interviewing phase (24 May–31 July).

Target population: People aged 18 years and over living within the areas governed by participating councils.

For further detail on the research method and design, please refer to the 2024 Technical Report available on the Quality of Life website: www.qualityoflifeproject.govt.nz/survey-results/

* Auckland Council's People's Panel is an online panel of more than 80,000 Auckland residents aged 18 and over who are invited to provide feedback to Auckland Council on a range of topics.

The final Auckland sample was n=2524.

Recruitment channels included:

Online panels: Sixty-five per cent (n=1639) of Auckland respondents were recruited through online panels (e.g. Ipsos iSay, Kantar ConsumerLink, Octopus, Dynata, Pure Profile, and Mobopinions). Online panellists were targeted by age, gender, ethnic group, and postcode (which was used to approximate geographic area).

People's Panel: Twenty-six per cent (n=646) of Auckland respondents were recruited through Auckland Council's People's Panel. Following the first wave of online panel fieldwork, the People's Panel was used to target specific groups where responses had fallen behind, e.g. males, under 35s, and non-Europeans. A total of 12,496 respondents from the People's Panel who met at least one of these criteria were invited to participate in the 2024 survey.

F2F interviewing: Seven per cent (n=178) of respondents were recruited face-to-face. Those aged under 25, Pacific and Asian peoples, and people living in southern Auckland suburbs were prioritised to meet sample targets.

Recontact sample: Two per cent (n=61) of respondents were recruited by recontacting previous respondents to the 2022 survey who had agreed to be recontacted.

Sample

The table shows the achieved sample size and the proportionate distribution of Auckland respondents in 2024. The sample is broadly representative by gender, age, ethnicity and area. Six broad areas were used for sampling and reporting (see map on the following page).

These align with local board areas as below:

- ▶ **North Auckland:** Hibiscus and Bays, Upper Harbour, Kaipātiki, Devonport-Takapuna
- ▶ **West Auckland:** Henderson-Massey, Whau, Waitākere Ranges
- ▶ **Central Auckland:** Albert-Eden, Puketāpapa, Waitematā, Waiheke, Ōrākei, Maungakiekie-Tāmaki
- ▶ **South Auckland:** Māngere-Ōtāhuhu, Ōtara-Papatoetoe, Manurewa, Papakura
- ▶ **East Auckland:** Howick
- ▶ **Rural Auckland:** Rodney, Franklin, Aotea / Great Barrier.

Note: Respondents were previously sampled by Auckland’s local board areas, with the aim of achieving n=100 per local board area (Waiheke and Aotea / Great Barrier were combined) and results were displayed by local board. However, small sample sizes for some local board areas meant the results could not accurately represent the diversity within each area. In addition, the change in recruitment methods in 2024 meant that respondents’ addresses were not captured and cannot be allocated with confidence to a local board area.

Subgroup	Sample achieved in each subgroup	Sample achieved in each subgroup	Proportion of Auckland results (n=2524)
	Weighted	Unweighted	Weighted %
Males	1233	1208	49
Females	1278	1300	51
Under 25 years	306	341	13
25–34 years	525	522	21
35–49 years	691	675	27
50–64 years	566	578	22
65+ years	436	408	17
European / Other	1326	1487	53
Māori	262	241	10
Pacific	352	305	14
Asian	790	764	31
North Auckland	521	501	21
West Auckland	392	409	16
Central Auckland	652	658	26
East Auckland	232	204	8
South Auckland	479	530	19
Rural Auckland	248	222	10
Auckland total	2524	2524	100

Note: Survey respondents were able to identify with more than one ethnic group, so the total responses may exceed 100 per cent.

Please refer to Appendix 1 for a breakdown of demographic characteristics of the Auckland sample.

Six broad geographic areas used for sampling and reporting

Code	Area
1	North Auckland
2	West Auckland
3	Central Auckland
4	South Auckland
5	East Auckland
6	Rural Auckland, including Aotea/Great Barrier (inset)

Questionnaire design

Many of the questions used in the 2024 survey were carried over from earlier surveys. However, several questions were added or refreshed (such as questions about transport, the natural environment, climate change, financial wellbeing, and the cost of living).

Questions about the impact of COVID-19 were dropped after the 2022 survey, to prioritise other important areas of wellbeing.

Differences between the 2022 and 2024 Quality of Life questionnaires are outlined in the Quality of Life survey technical report.

A full version of the Auckland questionnaire is included in [Appendix 2](#).

Margins of error

All sample surveys are subject to sampling error. Based on a total sample size of 2524 respondents, the Auckland results are subject to a maximum sampling error of plus or minus 2.0 per cent at the 95 per cent confidence level. That is, there is a 95 per cent chance that the true population value of a recorded figure of 50 per cent actually lies between 48.0 per cent and 52.0 per cent. As the sample figure moves further away from 50 per cent, the margin of error decreases.

Subgroup	Sample target	Sample achieved	Maximum margin of error (95% confidence level)
Males	1221	1208	2.8
Females	1279	1300	2.7
Under 25 years	328	341	5.3
25–34 years	529	522	4.3
35–49 years	673	675	3.8
50–64 years	569	578	4.1
65+ years	401	408	4.9
European / Other	1438	1487	2.5
Māori	237	241	6.3
Pacific	314	305	5.6
Asian	713	764	3.5
North Auckland	500	501	4.4
West Auckland	400	409	4.8
Central Auckland	650	658	3.8
East Auckland	200	204	6.9
South Auckland	500	530	4.3
Rural Auckland	250	222	6.6
Auckland total	2500	2524	2.0

This report

This report outlines the results to all questions asked in the 2024 Quality of Life survey, for Auckland respondents. The results are weighted to be broadly representative by age, gender, ethnicity, and geographic area.

Weighting: For the Auckland total, the results for each geographic area are post-weighted to their respective proportion of the Auckland population to ensure results are representative. For example, those aged 18–24 years represent 12.1 per cent of Auckland’s total population (as at 2023 Census) but 13.5 per cent (n=341) of the total sample size. An adjustment was made to the results to accommodate the higher representation of this age group in the survey.

Rounding: Due to the effects of rounding, percentages shown in charts may not always add to 100.

Counts: Results are presented in charts to indicate the sum of negative or positive responses. Counts may differ slightly from the sum of the corresponding figures, due to rounding.

Base sizes: All base sizes shown on charts and on tables are unweighted base sizes (although all results are weighted). Please note that any base size of under n=100 is considered small and under n=50 is extremely small. Therefore, these results are indicative only. Small base sizes are shown on charts with an asterisk (*).

Total response ethnicity: This approach was used to allow people to report multiple ethnicities, so percentages may exceed 100 per cent.

Statistically significant differences: Statistical differences are highlighted only when the difference is statistically significant at the 95 per cent confidence level and the difference in results is 5 percentage points or greater.

- ▶ An upward chevron (^) is used to indicate when a result is significantly higher than the rest of Auckland.
- ▶ A downward chevron (v) is used to indicate when a result is significantly lower than the rest of Auckland.

A comment on the Quality of Life – Tāmaki Makaurau/Auckland results

The results presented in this report focus on geographic area, age group and ethnicity.

There are two important considerations when reviewing the results.

First, the survey and report are primarily descriptive and are not designed to examine the underlying drivers and motivations that may influence how individuals respond to survey questions.

Second, there are intersections between the variables presented in this report, which can amplify narratives of advantage and disadvantage. For example, respondents who identified as Māori, Pacific and/or living in South Auckland were less likely than others to rate their overall quality of life positively, agree that their home suits their needs, trust other people in their local area, and rate their physical health positively. They were also more likely to identify rough sleeping, vandalism, and alcohol/drug-related problems as issues in their local area, and more likely to report their concern about the impacts of climate change.

However, as the demographic profiles indicate (see Appendix 1), Māori and Pacific respondents were more likely than other respondents to be younger (of the 343 respondents aged between 18 and 24, 18 per cent identified as Māori and 23 per cent identified as Pacific) and more likely to live in South Auckland than other parts of Auckland (18 and 38 per cent of Māori and Pacific respondents, respectively).

While age, place of residence and ethnicity can independently impact quality of life, the combination of these factors can have a compounding effect.

Given the complexity of how age, ethnicity, and geographic location intersect, these results should be interpreted with caution, as the compounded effects of these factors may skew the understanding of quality of life and potentially obscure underlying issues that require more targeted investigation.

TE KOROU O TE ORA / QUALITY OF LIFE

This section presents results on respondents' perceptions of their overall quality of life and whether it has changed compared to a year ago.

Overall quality of life

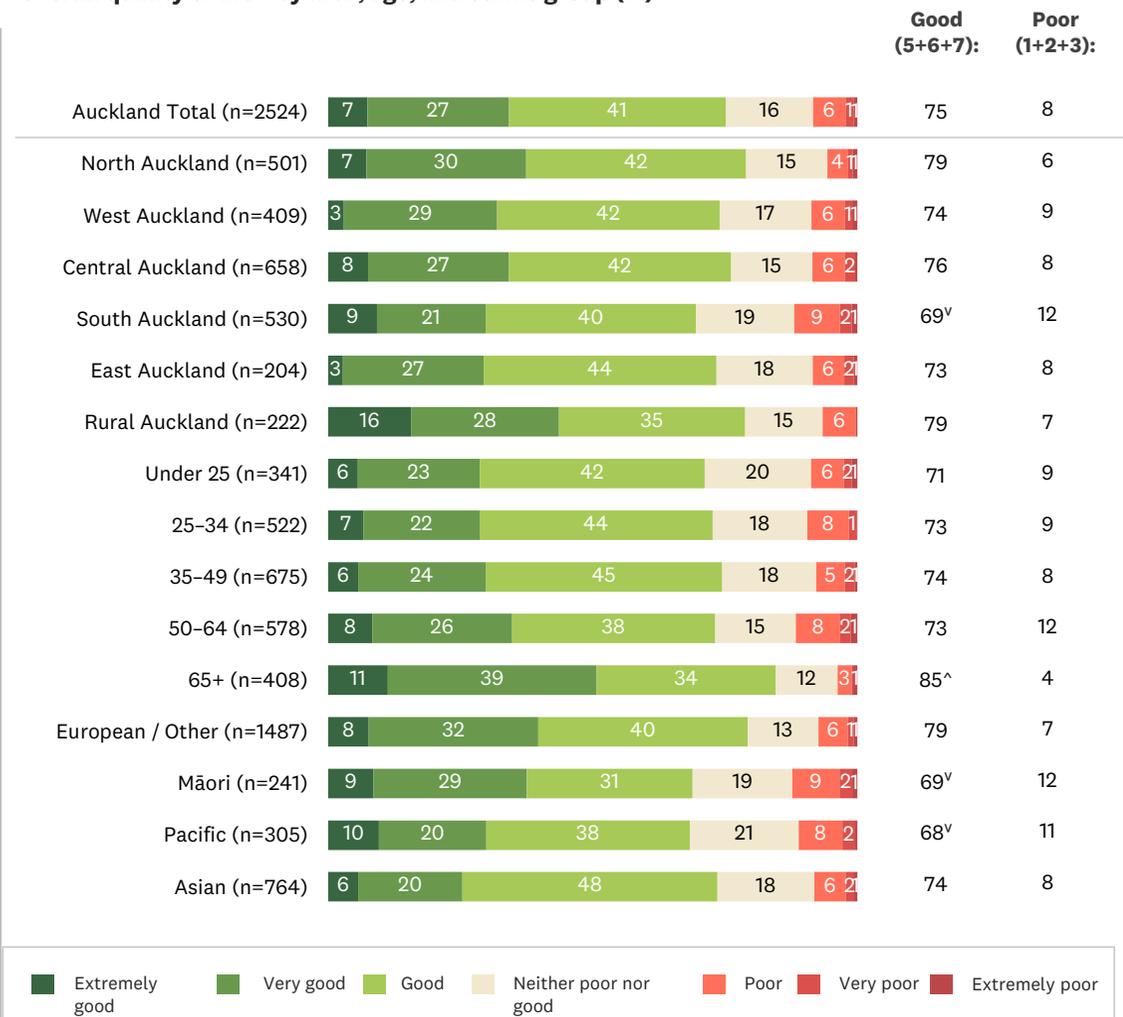

Three-quarters (75%) of Auckland respondents rated their quality of life positively, with 7 per cent rating it as 'extremely good', 27 per cent rating it as 'very good' and 41 per cent rating it as 'good'. Just 8 per cent rated their quality of life negatively.

A smaller proportion of respondents living in South Auckland (69%) rated their quality of life positively, although only 12 per cent rated their quality of life poorly.

Respondents aged 65 and over (85%) were more likely than other age groups to rate their quality of life positively.

Māori (69%) and Pacific (68%) respondents were less likely than other ethnic groups to rate their quality of life positively.

Overall quality of life – by area, age, and ethnic group (%)

Base: All respondents (excluding not answered)

Source: Q2: Would you say that your overall quality of life is...

(1 - Extremely poor, 2 - Very poor, 3 - Poor, 4 - Neither poor nor good, 5 - Good, 6 - Very good, 7 - Extremely good)

Change in quality of life compared with 12 months prior

Three in ten respondents (30%) felt their quality of life had decreased over the previous year, while 25 per cent felt it had increased.

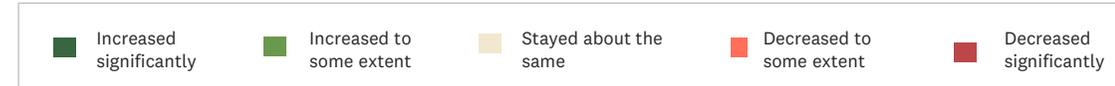

Auckland respondents aged under 35 (38%) were significantly more likely to report that their quality of life increased over the previous 12 months, while those aged between 50 and 64 (16%) and 65 and over (14%) were less likely to do so.

Māori (40%) and Pacific respondents (37%) were significantly more likely to report that their quality of life had increased in the previous 12 months, compared with other ethnic groups.

There were no significant differences by geographic area.

Change in quality of life - by area, age, and ethnic group (%)

(1 - Decreased significantly, 2 - Decreased to some extent, 3 - Stayed about the same, 4 - Increased to some extent, 5 - Increased significantly)

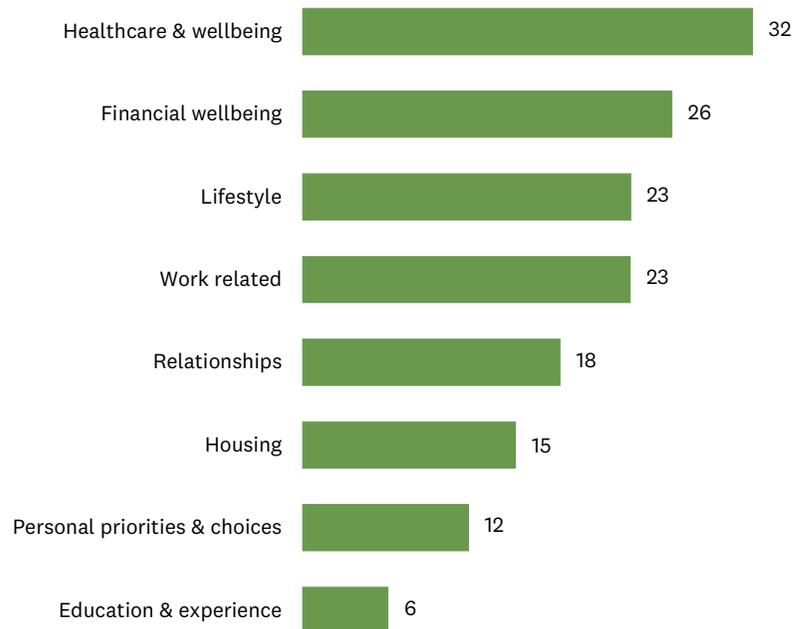

Reasons for positive changes in quality of life

Twenty-five percent of Auckland respondents felt their quality of life had improved compared to 12 months prior. Respondents were asked to explain why this was, in their own words, and results were coded into themes.

The most common themes related to healthcare and wellbeing (32%), financial wellbeing (26%), lifestyle (23%) and work (23%).

Relationships (18%), personal priorities and choices (12%), and education and experience (6%) were also cited as reasons for improved quality of life.

Reasons for increased quality of life – Auckland total (%)

(Themes mentioned by 5% or more of respondents)

Reasons for positive changes in quality of life – examples of verbatim comments

“I have gained financial independence & security by purchasing a house and getting a new job with better pay. Despite the cost of living crisis I am feeling more positive about my quality of life and I’m grateful of my position.”

Female, 50–64 years

“I have become engaged to a lovely woman ... Moved into a new home with my fiancée and [our new-born] son. Life has come together collectively for me in the past year, as upon reflection I see how much I’ve changed for the better in my life.”

Male, 18–24 years

“I moved into a nicer house with better flatmates in a better area. My income went up so I could afford these changes and feel less stressed about them.”

Female, 18–24 years

“I am looking after myself better. Going for walks, exercising and eating healthy. I am also prioritising myself and my work which decreases my stress levels.”

Female, 18–24 years

“I’ve since gotten Permanent Residency which opens a lot of doors for me professionally. This has also lifted a huge mental strain on me - I feel much more free now. It’s a great feeling. I can now focus on what I WANT to do and not what I HAVE to do to be happy in life.”

Male, 35–49 years

“I was struggling with my mental and physical health following multiple traumatic events but I have since made progress in terms of my well-being and been getting more involved in my community again.”

Female, 35–49 years

Reasons for negative changes in quality of life

Thirty percent of Auckland respondents felt their quality of life had decreased compared to 12 months prior. Respondents were asked to explain why this was, in their own words, and results were coded into themes.

The most common themes related to reduced financial wellbeing (67%) and reduced healthcare and wellbeing (33%).

Other reasons cited were related to work (15%), aspects of their local area (12%), lifestyle (11%), relationships (8%), and housing (7%).

Reasons for decreased quality of life – Auckland total (%)

(Themes mentioned by 5% or more of respondents)

Base: All respondents who said their quality of life ‘decreased’ in the last 12 months (n=754)

Source: Q4: Why do you say your quality of life has changed in the last 12 months?

Note: Only themes mentioned by 5 per cent or more of respondents are shown. Comments could be coded across more than one theme.

“The cost of living is high and as an international student the tuition fee is very high.”

Female, 18-24 years

“Prices have skyrocketed in the last 12 months and because of that I have had to change some of my spending habits especially when it comes to food, leisure, and health.”

Female, 25-34 years

“The cost of living has made my day to day life harder. Every time I leave the house I feel like I spend a minimum of \$50. I am strict with spending however the cost of everything has increased but my wages haven’t. I work a 40 hour week and I am living pay check to pay check. I live with multiple people to make rent cheaper. The cost of living has forced me to buy less nutritious food and that has affected my health. I do not see friends or family as often due to the cost of activities and food. That has ultimately affected my mental health. As a young person of 21 without any parental guidance I live in constant fear that I will not be able to pay my bills or eat.”

Male, 18-24 years

“Over the past 12 months, my quality of life has significantly decreased because I had to move from house-sitting to renting a small room in a shared house. The only affordable option was a converted storage space measuring 1.5x2.5 meters next to a garage, with inadequate ventilation and no room for a wardrobe. I share the house with eight other people and have access to only one bathroom, which has been challenging. This change was financially necessary, and I could only afford it with help from friends and family.”

Female, 25-34 years

“I live on the government pension only. The increases of costs on everything, utilities/registration/food/insurance are becoming increasingly unaffordable. The pension is just a kick in the face, after faithful hard work done for 50 yrs.”

Male, 65+ years

“Feel unsafe due to rising crime. Ratepayers in our areas have sent numerous complaints to Papakura local board and Auckland Council about boy racers on Wairoa Road & Cars speeding at 70-90 km on 50 Zone in our area with no speed bumps, rumblers installed and no speed cameras.”

Male, 35-49 years

Affordability of housing costs

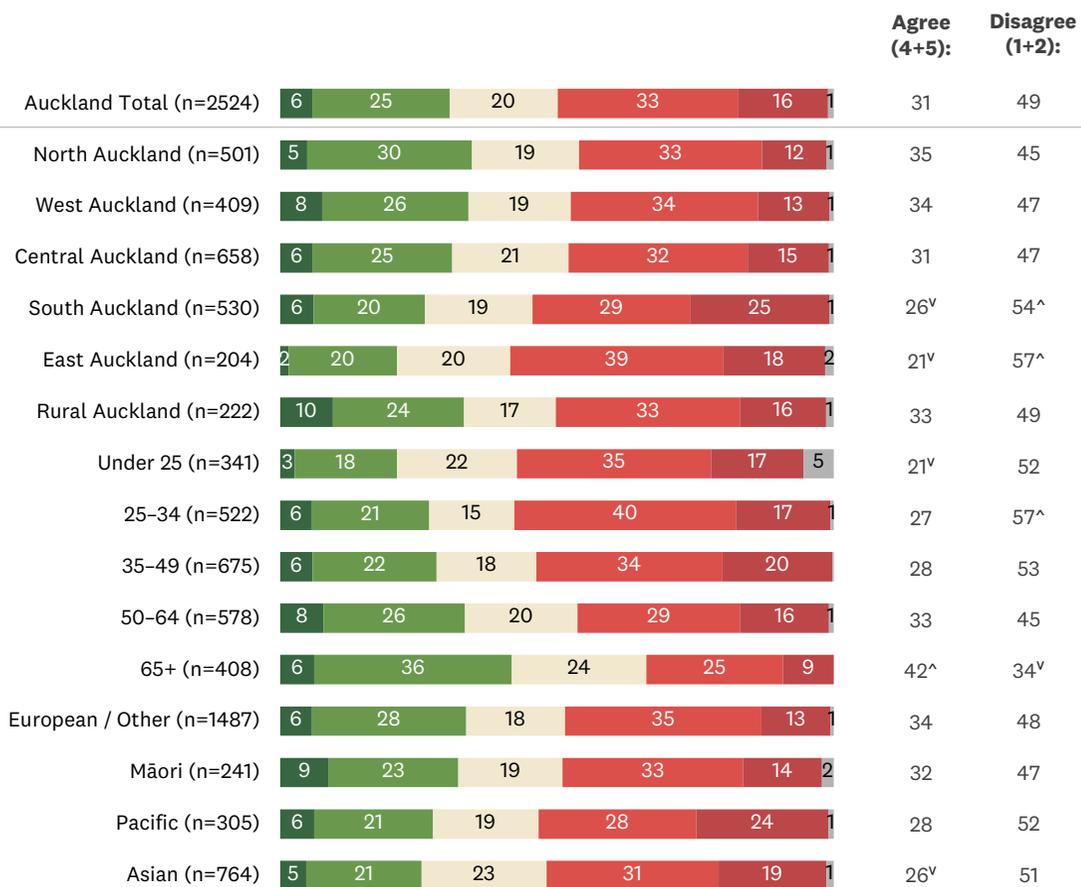

Nearly half (49%) of Auckland respondents disagreed that their current housing costs (e.g. rent or mortgage, rates, house insurance and house maintenance) were affordable. Less than one-third (31%) agreed that their housing costs were affordable.

Respondents living in South (26%) and East Auckland (21%) were less likely than others to agree their housing costs were affordable.

Respondents aged 65 and older (42%) were more likely to agree that their housing costs were affordable, while those aged 18 to 24 (57%) were less likely to agree.

Asian respondents (26%) were less likely than other ethnic groups to agree that their housing costs were affordable.

Housing affordability – by area, age, and ethnic group (%)

Base: All respondents (excluding not answered)

Source: Q8: This question is about the home you currently live in. How much do you agree or disagree that: *Your housing costs are affordable*

Nearly three-quarters (72%) of Auckland respondents agreed that the home they live in suited their needs and the needs of others in their household.

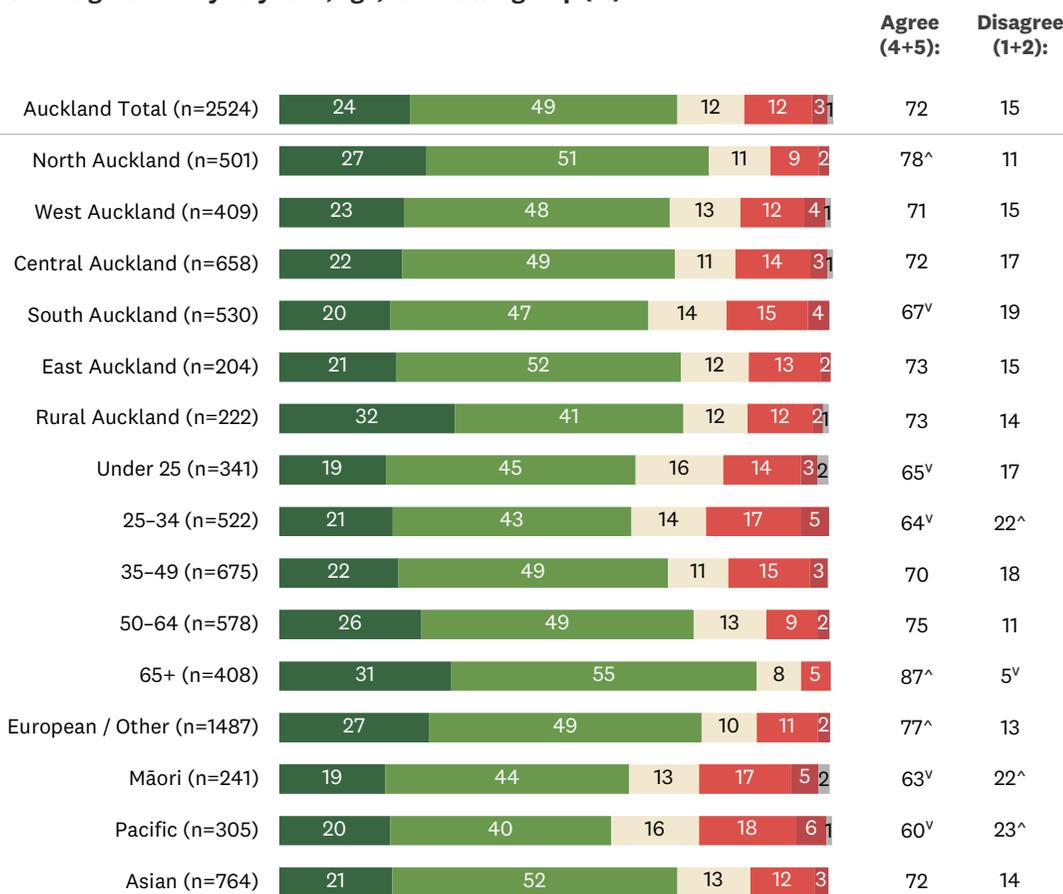

Those who lived in North Auckland (78%) were more likely to agree that their home was suitable to the needs of their household, while those living in South Auckland (67%) were less likely to agree.

Auckland respondents aged between 18 and 24 (65%) and 25 and 34 (64%) were less likely to agree that their home met their needs and those of their household. In contrast, those aged 65 and older (87%) were more likely to agree that their housing met their household needs.

Māori and Pacific respondents (63% and 60%, respectively) were significantly less likely to report that their housing met the needs of their household.

Note: The wording of this question was changed in 2024.

Housing suitability - by area, age, and ethnic group (%)

Base: All respondents (excluding not answered)

Source: Q8: This question is about the home you currently live in. How much do you agree or disagree that: *The home you live in suits the needs of everyone in your household*

(1 - Strongly disagree, 2 - Disagree, 3 - Neither agree nor disagree, 4 - Agree, 5 - Strongly agree, 98 - Don't know)

Neighbourhood suitability

Just under three-quarters (73%) of Auckland respondents agreed that the general area or neighbourhood they currently live in suits the needs of everyone in their household.

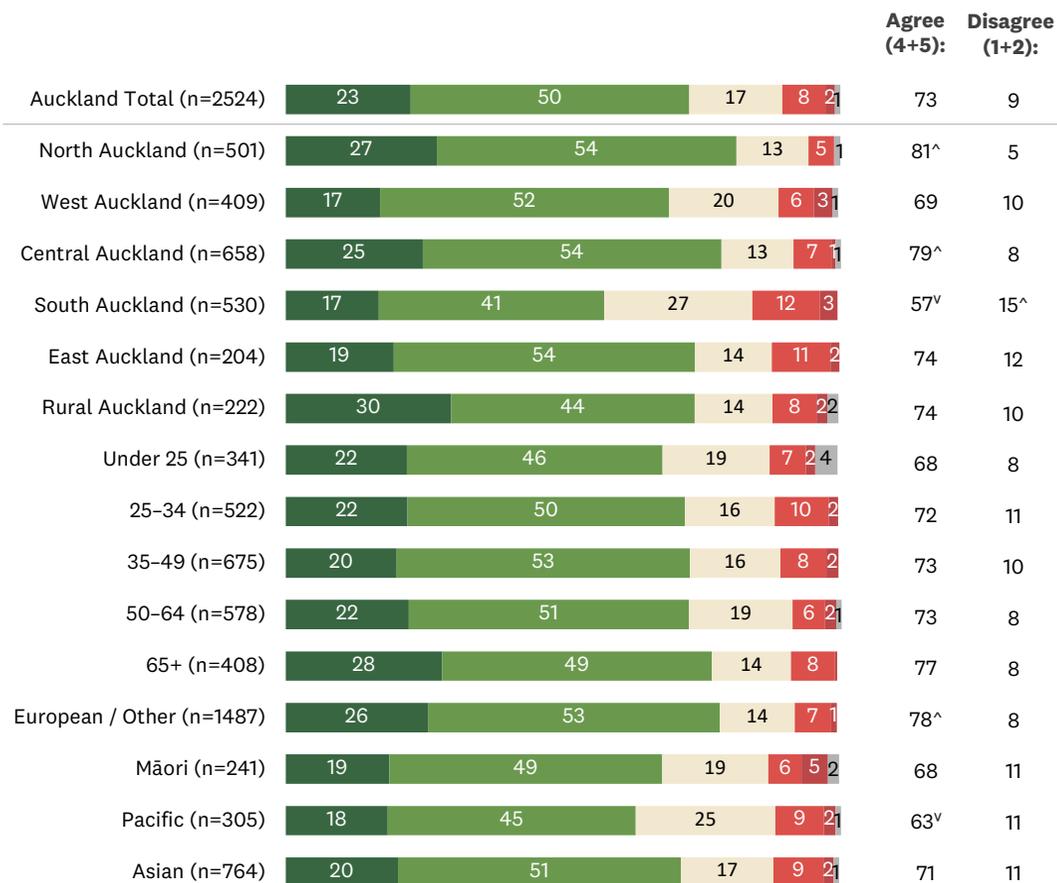

Respondents living in North (81%) and Central Auckland (79%) were more likely to agree that their neighbourhood met their needs, while those living in South Auckland (57%) were less likely to agree. A further quarter (27%) of those living in South Auckland neither agreed nor disagreed.

There were no significant differences in perceptions of neighbourhood suitability by age group.

European respondents (78%) were more likely to agree that their neighbourhood suited the needs of their household, while Pacific respondents (63%) were less likely to agree.

Note: The wording of this question was changed in 2024.

Knowledge of climate change impacts for Auckland

Six out of ten (60%) Auckland respondents thought they understood climate change and its potential impact on Auckland over the next 5 years either 'very' or 'fairly' well.

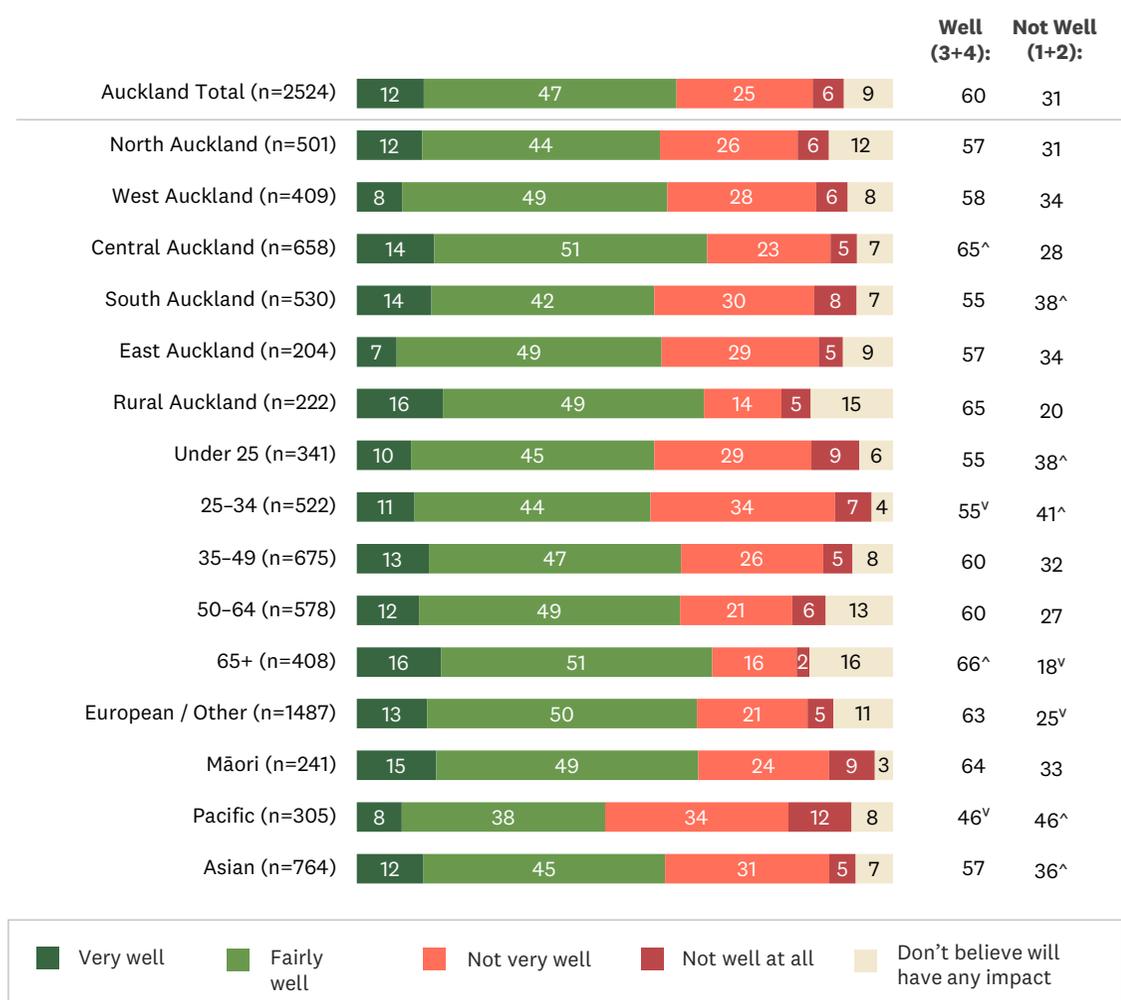

Those living in Central Auckland (65%) were more likely to say they understood the impacts well, while those living in South Auckland (38%) were more likely to report that they did not.

Two-thirds of Auckland respondents aged 65 and older (66%) said they understood the impacts well, while younger Auckland respondents between 18 and 34 were more likely to say they did not.

Pacific Aucklanders (46%) were less likely to say they understood climate change and its potential risks for Auckland 'very' or 'fairly' well, when compared with other ethnic groups.

Note: This is a new question added in 2024.

Knowledge of climate change impacts – by area, age, and ethnic group (%)

Base: All respondents (excluding not answered)

Source: Q39: How well do you think you understand climate change and the impacts it could have on Auckland in the next 5 years?

(1 - Not well at all, 2 - Not very well, 3 - Fairly well, 4 - Very well, 5 - I don't believe climate change will have any impacts on Auckland in the next 5 years)

Worry about climate change impacts for Auckland

Two-thirds of Auckland respondents (64%) said they were ‘not at all worried’ or only ‘a little worried’ about the impact of climate change on the future of Auckland and its residents, while one-third (37%) said they were ‘worried’ or ‘very worried’.

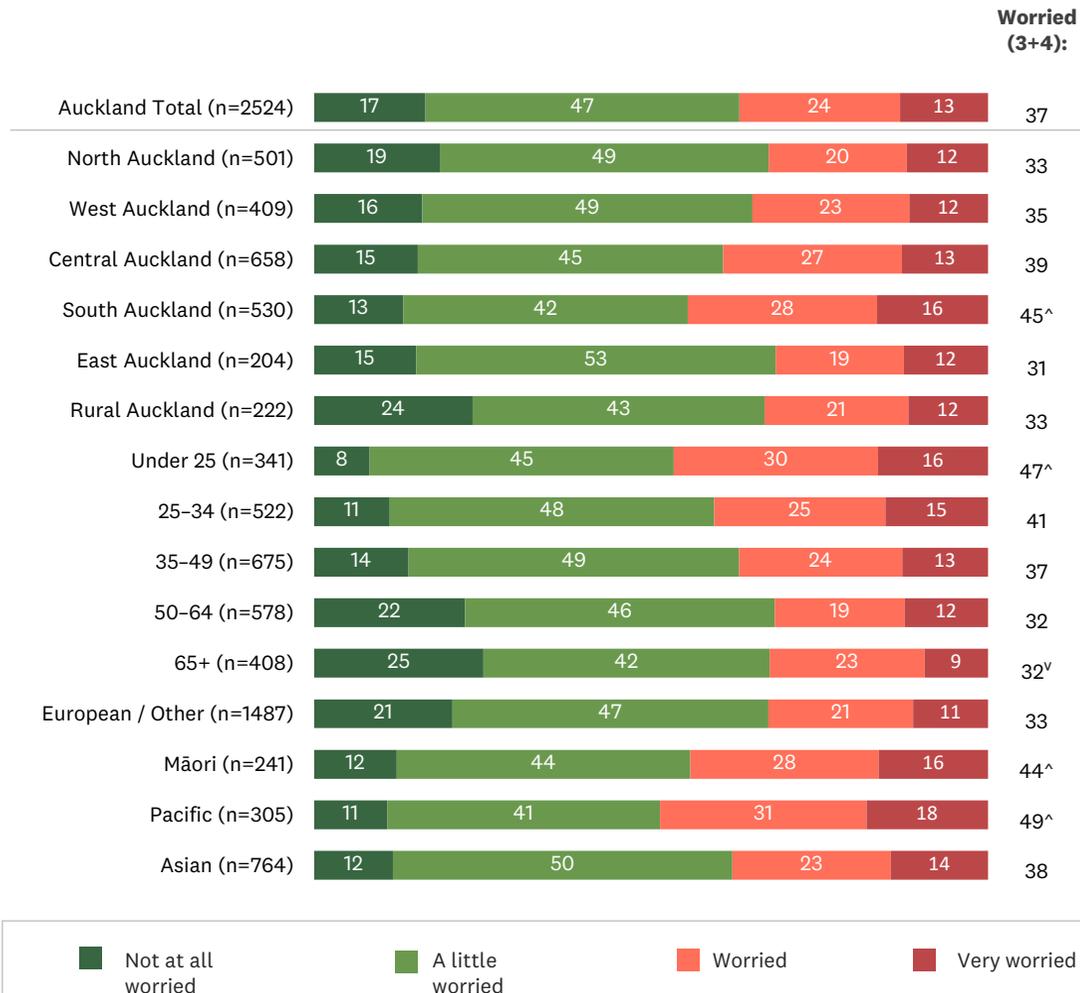

Those living in South Auckland (45%) were more likely than other groups to report their concern.

Nearly half (47%) of respondents aged between 18 and 24 reported their concern about the impacts of climate change, while one-third (32%) of those aged 65 and older did so.

Pacific (49%) and Māori (44%) respondents were more likely than the rest of the sample to report that they were worried or very worried about the impacts of climate change on the future of Auckland and its residents.

Note: Previous QoL surveys included answer options: “I don’t know enough about climate change” and “I don’t believe in climate change”. These were removed in 2024.

Worry about climate change impacts – by area, age, and ethnic group (%)

Base: All respondents (excluding not answered)

Source: Q40: To what extent do you personally worry about the impact of climate change on the future of Auckland and residents of Auckland?

(1 - Not at all worried, 2 - A little worried, 3 - Worried, 4 - Very worried)

Perceptions of environmental problems

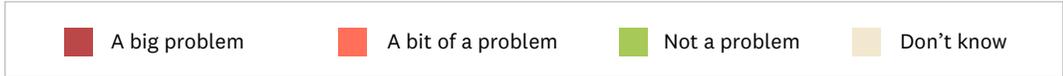

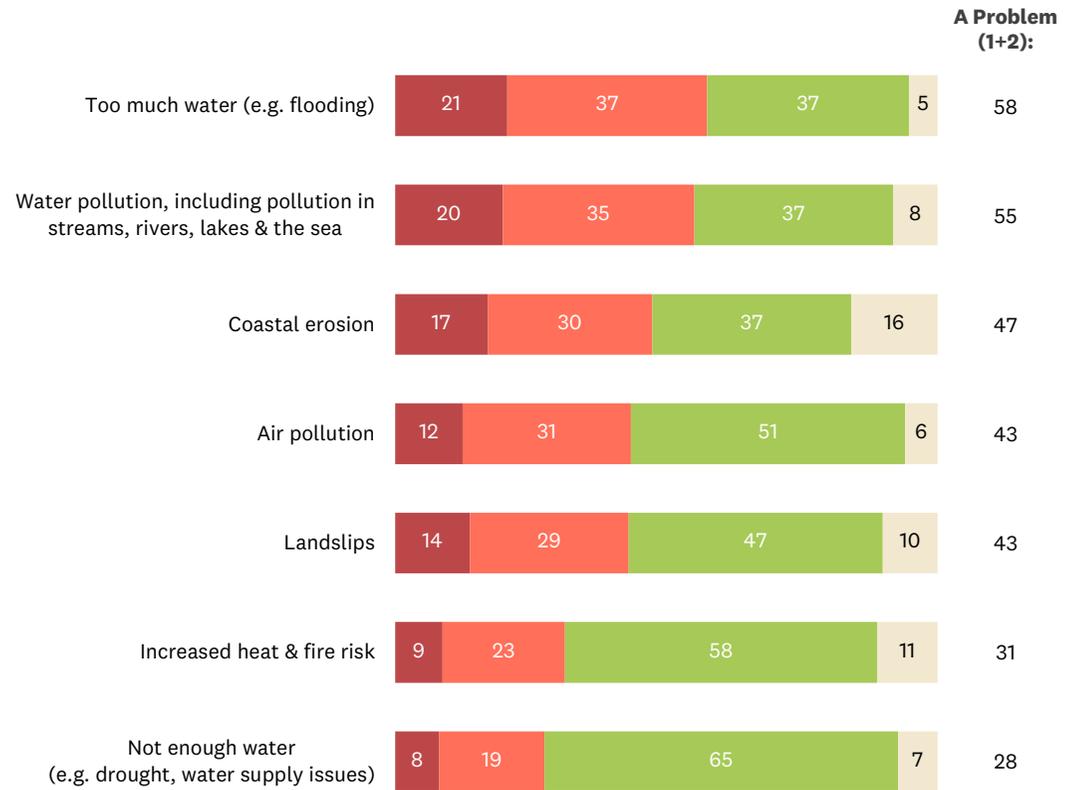

Respondents were asked to indicate whether they perceived a number of specific issues had been a problem in their local area in the previous 12 months.

Water-related environmental issues were most commonly reported as having been a problem. Over half (58%) said that ‘too much water’ was an issue and 55 per cent said that ‘water pollution’ was an issue.

Coastal erosion (47%) was the third most common response, followed by air pollution (43%) and landslips (43%).

This question is an expansion of the ‘local issues’ question asked in 2022. New issues were added in 2024.

Rating of environmental issues as a problem in local area (summary) – Auckland total (%)

Base: All respondents (excluding not answered) (n=2,524)

Source: Q37: To what extent, if at all, has each of the following been a problem in your local area over the past 12 months?

(1 – A big problem, 2 – A bit of a problem, 3 – Not a problem, 98 – Don't know)

Too much water

Fifty-eight per cent of Auckland respondents said that ‘too much water’ had been a ‘big problem’ or a ‘bit of a problem’ in their local area in the previous 12 months.

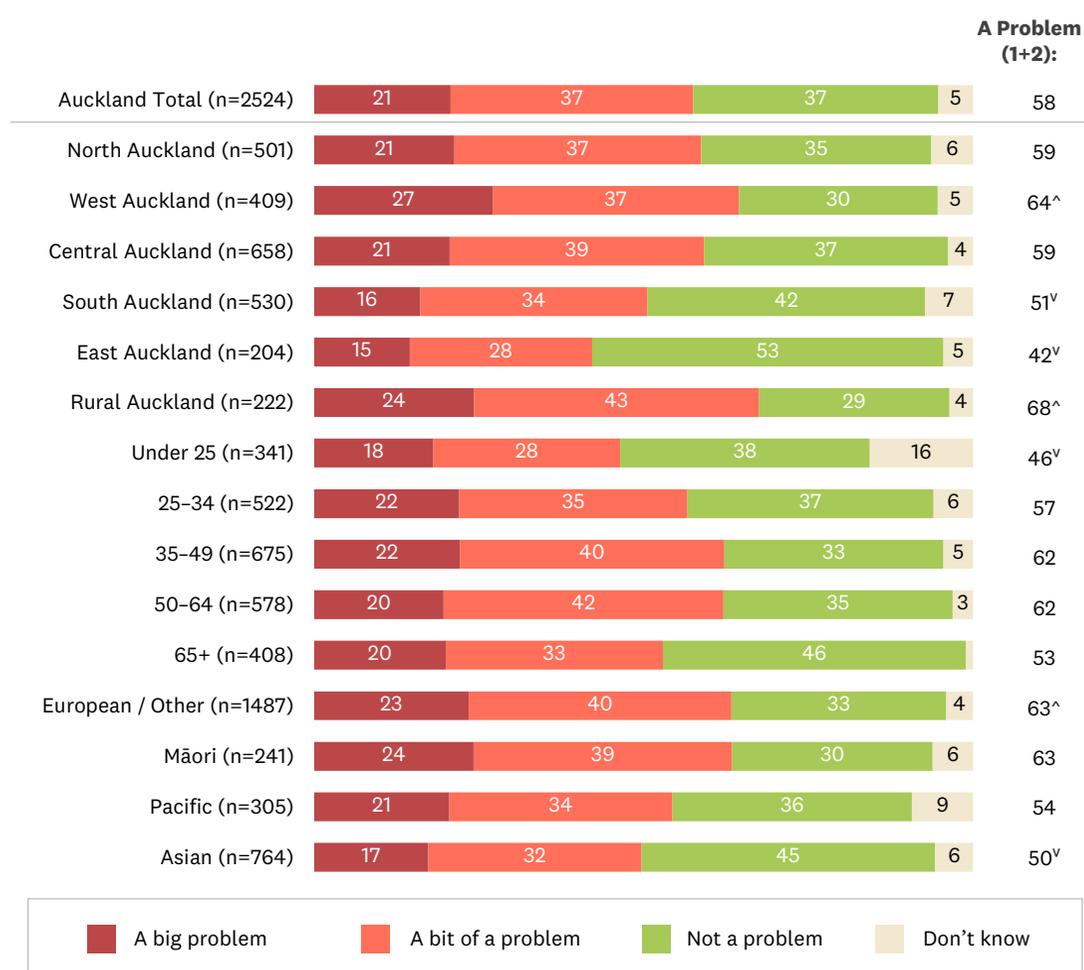

Those who were living in Rural (68%) and West Auckland (64%) were more likely to report that too much water had been a problem, while those in South (51%) and East Auckland (42%) were less likely to report that this had been a problem.

People under 25 years of age (46%) were less likely to report that too much water had been a problem in their local area.

European (63%) respondents were more likely to report that too much water was an issue, while Asian (50%) respondents were less likely.

Note: This is a new question added in 2024.

Perceived ‘too much water’ – by area, age, and ethnic group (%)

Perception of local area compared to 12 months prior

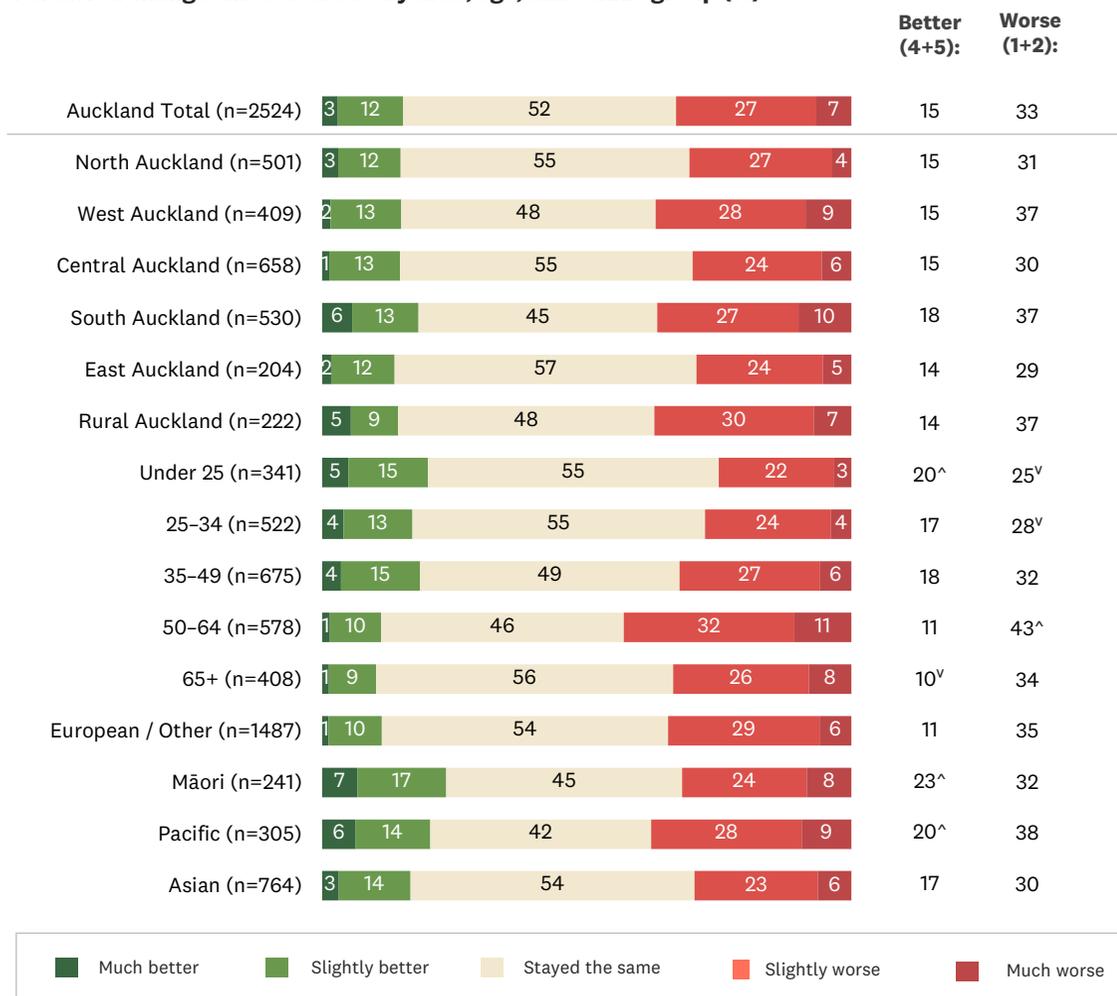

When asked whether their local area had become better, worse, or stayed the same as a place to live over the previous 12 months, a third (33%) of respondents said their local area had become worse, while 15 per cent felt it had become better.

There were no significant differences in perception by area.

Respondents aged between 50 and 64 (43%) were more likely to feel that their local area had got worse as a place to live in the previous 12 months, while younger age groups were significantly less likely to feel the same way.

Māori (23%) and Pacific respondents (20%) were more likely than other ethnic groups to feel that their local area had got better as a place to live in the previous 12 months.

Perceived changes in local area - by area, age, and ethnic group (%)

Base: All respondents (excluding not answered)

Source: Q6: And in the last 12 months, do you feel your local area has become better, worse, or stayed the same as a place to live?

(1 - Much worse, 2 - Slightly worse, 3 - Stayed the same, 4 - Slightly better, 5 - Much better)

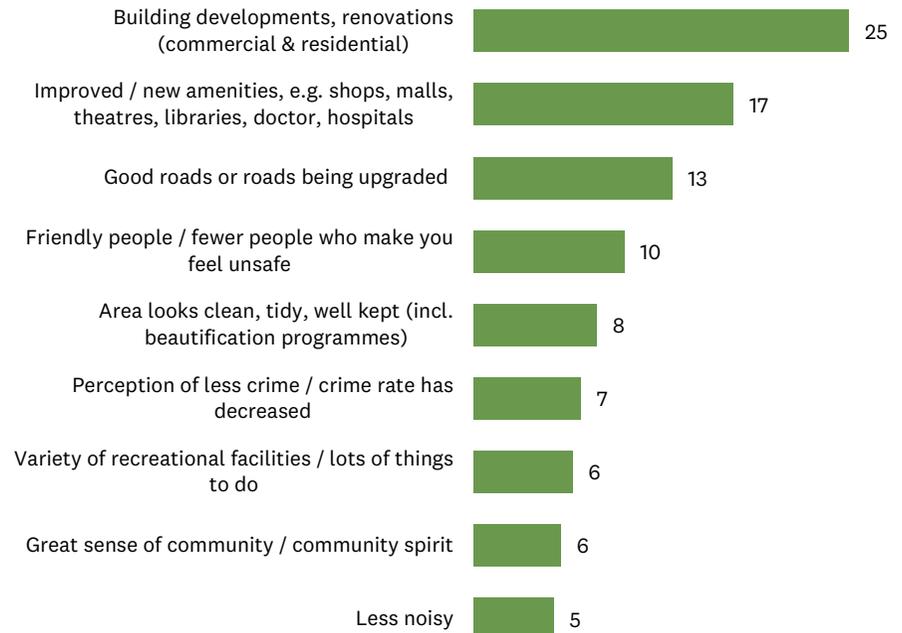

Reasons why local area improved in last 12 months

Fifteen percent of Auckland respondents felt their local area had become better as a place to live in the previous 12 months. Respondents were asked to explain why, in their own words, and results were coded into themes.

The most common themes related to building developments and renovations in the area (25%), good roads or roads being upgraded (17%) and improved and/or new amenities (17%).

In 2022, a ‘great’ sense of community was the third most common reason for respondents feeling that their local area was better. In 2024, this appears to be of less concern (6%).

Reasons for improved local area – Auckland total (%)

(Themes mentioned by 5% or more of respondents)

Base: All respondents who said their local area became better in the last 12 months (n=345)

Source: Q7: Why do you say your local area has changed in the last 12 months as a place to live?

“There’s a nice mixture of different races. Feels like the area has upgraded with nice new townhouses. See a lot more people out and about, walking, cycling, running, it’s nice and makes me feel safe.”

Female, 35–49 years

“I like the neighbours who live around me because they are really friendly. Also I am using buses to go to my work place and all buses are coming every 15 min, 30 min. There are lots of supermarkets, shopping mall near to me.”

Female, 25–34 years

“Because of things like new roading options as well as public transport improvements. I love some of the new roads that have been constructed. Makes getting around Auckland more enjoyable. We also have a lot of new developments and housing. So really looks good.”

Male, 50–64 years

“There are newly built apartments and easier to look for where to move. There are more transport options for me. New cafes and restaurants available for me to choose if I don’t have time to prepare for my own food.”

Female, 25–34 years

“It is growing and adapting to the changes in housing development. A greater mixture of smaller houses are being built - terraced, apartments etc. I feel this is positive as more people have the chance to own their own homes.”

Male, 65+ years

“There are new buildings that have finished construction. There are less scaffolds and fenced off areas which means more places to walk to and wander around in.”

Male, 18–24 years

Reasons why local area worsened in last 12 months

A third (33%) of Auckland respondents felt their local area had become worse as a place to live in the previous 12 months. Respondents were asked to explain why, in their own words, and results were coded into themes.

Almost half (49%) of their comments were themed as perceptions of increased crime/crime rates, followed by housing developments (22%) and issues with roading developments (20%), including cycle lanes, footpaths and roadworks.

Other reasons provided include more traffic and traffic congestion (19%) and the area looking rundown (16%).

Reasons for worsened local area – Auckland total (%)

(Themes mentioned by 5% or more of respondents)

Base: All respondents who said their local area became worse in the last 12 months (n=840)

Source: Q7: Why do you say your local area has changed in the last 12 months as a place to live?

Note: Only themes mentioned by 5 per cent or more of respondents are shown. Comments could be coded across more than one theme.

“Three shootings in my street alone in the last 12 months. Previously, a mother was blind shot dead through her door - all over drugs. I wrote to the council to fix lighting on our street, at the alley way beside my house as shooters were chased up there, by my Jack Russell when my neighbours car windows were recently shot out. I got me another dog - Staffy for protection. “

Female, 50–64 years

“Our area has become more intensely populated with most streets with cars parked both sides making getting about difficult and dangerous. Now we have lost many public rubbish bins. Our schools are overburdened. Our granddaughter is in a class of over 60. Our street kerbs and drains are full with rubbish, leaves & debris. The whole appearance of the area has declined.”

Male 65+ years

“A large apartment block has been built nearby. There is a lack of parking associated with the building and my street has become crowded and dangerous with cars parking, sometimes incorrectly. The shops that were built at street level in the buildings are unoccupied, or are not appropriate for the area. They do not contribute anything worthwhile to the community.”

Female, 65+ years

“A lot of homeless people. More jobless people. Violence and crime going up. People are struggling and feeling unsafe.”

Female, 65+ years

“Too much construction and low quality housing being built in the area and too busy, too much traffic.”

Male, 35–49 years

“Too many apartment blocks with little or no green space and virtually no parking. The main street has become blocked /choked by the rarely used bike lanes and the narrowing of the road. We rarely had traffic queues, now they’re almost constant. As part of the narrowing of the road to provide bike lanes, 74% of the parking was removed. When the apartments are completed, there will be no parking for the owners, no green space for the children to play and the mums will have to carry their groceries, pushchairs/prams and children up multiple flights of stairs. The apartments and the roading is not fit for purpose.”

Male, 50–64 years

Perceptions of problems in their local area

Respondents were asked which of a series of possible ‘problems’ had been an issue in their local area in the previous 12 months.

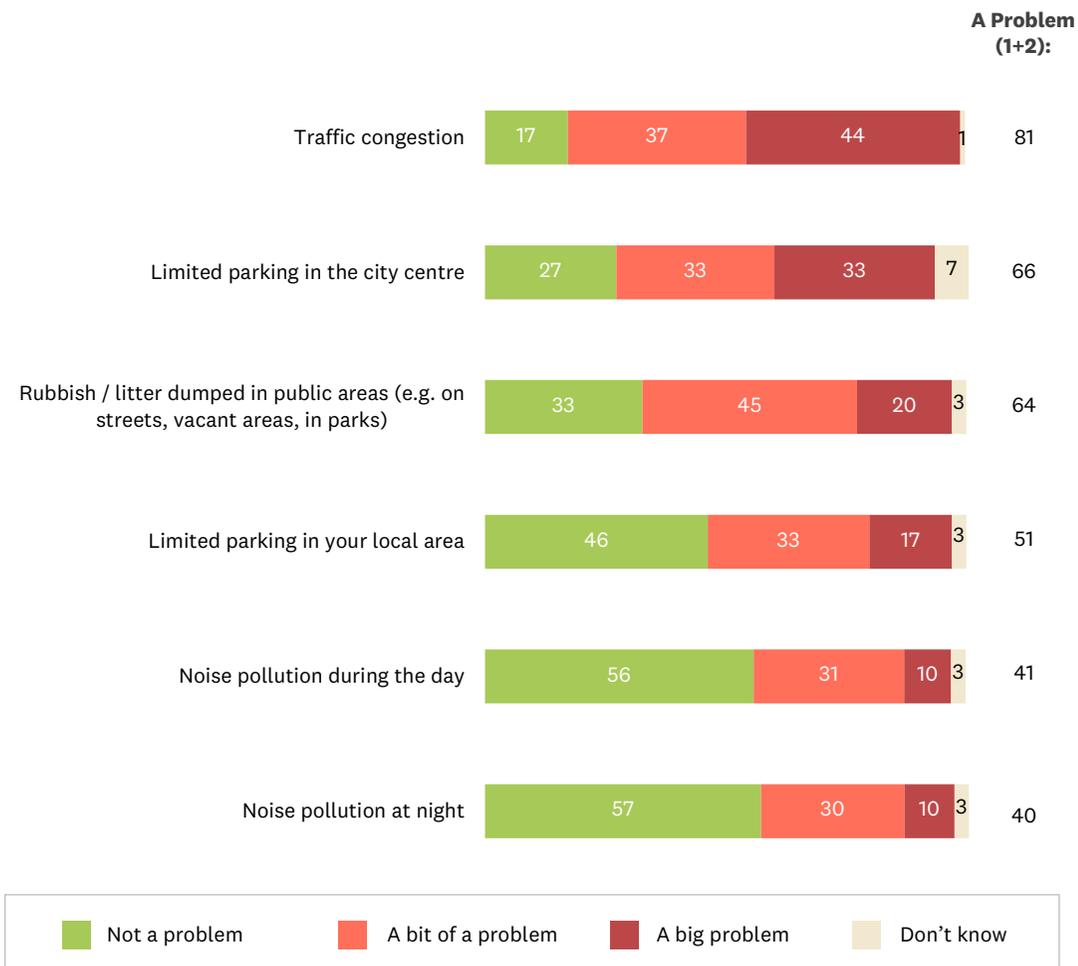

Eighty-one per cent of respondents reported that traffic congestion had been a ‘bit of a problem’ or a ‘big problem’.

Two-thirds (66%) of respondents said that limited parking in the city centre and rubbish/litter dumped in public areas (64%) had been a problem.

Limited parking in their local area (51%), noise pollution during the day (41%) and noise pollution at night (40%) were also cited as a ‘bit of a problem’ or a ‘big problem’.

Note: New issues were added to this question in 2024.

Rating of issues as a problem in local area (summary) – Auckland total (%)

Traffic congestion

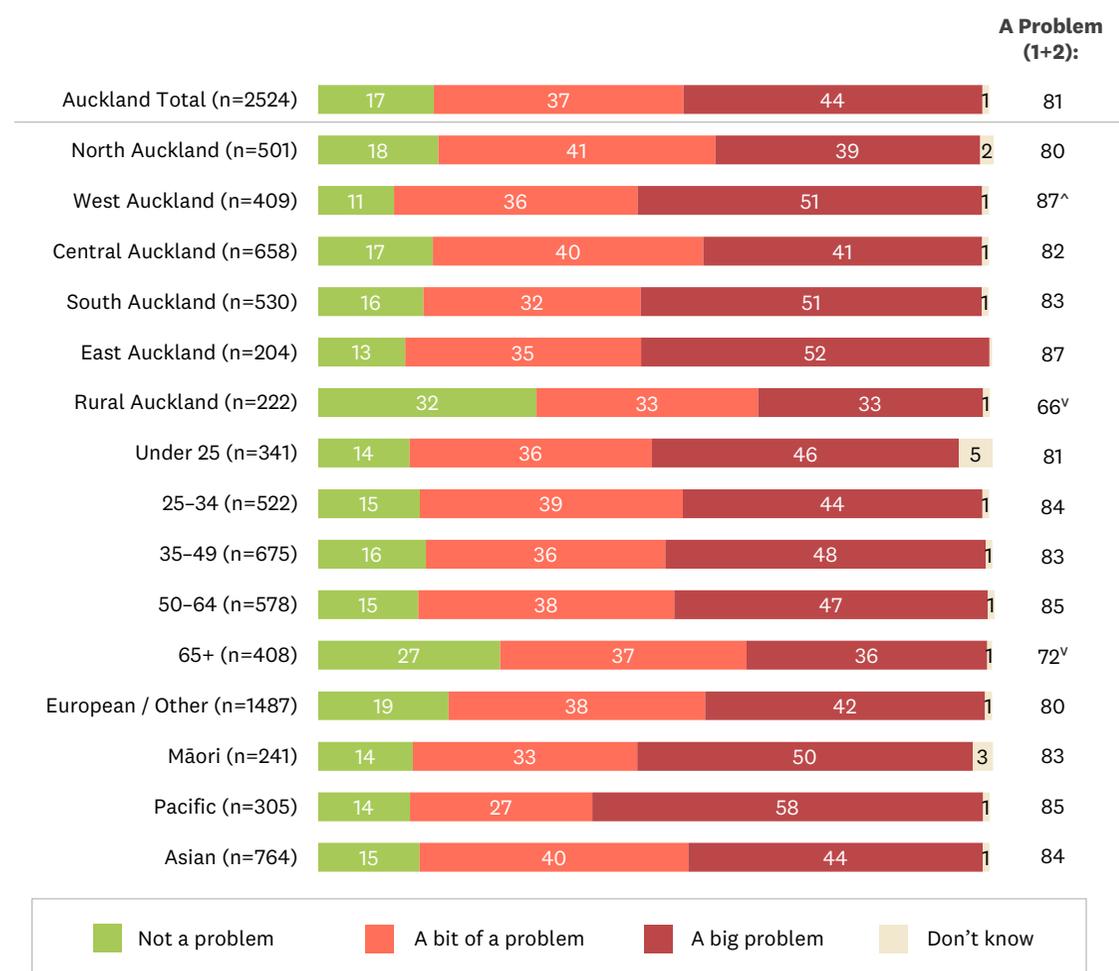

Traffic congestion was rated as a problem by eight out of ten (81%) Auckland respondents.

Respondents living in West Auckland (87%) were more likely to report that traffic congestion had been a problem in their local area in the previous 12 months, while those living in Rural Auckland (66%) were less likely to report this as problematic.

Respondents aged 65 and over were significantly less likely than others to report that traffic congestion in their local area had been a problem in the previous 12 months.

There were no significant differences by ethnicity.

Rating of social issues in local area

Respondents were asked about the extent to which they perceived each of a number of specific social issues to have been an issue in their local area in the previous 12 months.

Over half felt that people begging in public spaces (59%), alcohol / drug problems and/or antisocial behaviour associated with the use of alcohol / drugs (59%), people [they] feel unsafe around because of their behaviour, attitude or appearance (56%), and people sleeping rough in public spaces / vehicles (52%) were an issue in their local area.

Note: These questions have changed in 2024 - previous QoL surveys asked whether respondents thought these had been a 'problem' rather than an 'issue' in their local area.

Frequency of using public transport

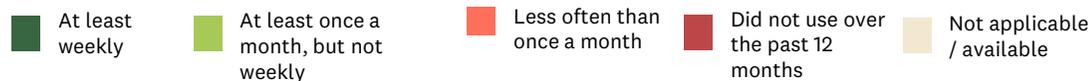

Two-thirds of Auckland respondents had used public transport in the previous 12 months, and one-quarter (26%) had used public transport at least weekly.

Use of public transport in the previous 12 months was most commonly reported by respondents who lived in Central Auckland (75%). Forty-four per cent of those who lived in Rural Auckland reported having used public transport in the previous 12 months.

Younger people were more likely to have used public transport in the previous 12 months; 81 per cent of those aged under 25 and 72 per cent of those aged 25 to 34. Respondents aged between 50 and 64 (55%) were less likely to have used public transport in the previous 12 months.

Asian respondents (75%) were significantly more likely to have used public transport in the previous 12 months, compared with other ethnic groups.

Frequency of using public transport - by area, age, and ethnic group (%)

Base: All respondents (excluding not answered)

Source: Q12: In the last 12 months, how often have you used public transport in Auckland?

(1 - At least weekly, 2 - At least once a month but not weekly, 3 - Less often than once a month, 4 - Did not use over the past 12 months, 5 - Not applicable / available in Auckland)

Perceptions of public transport – summary

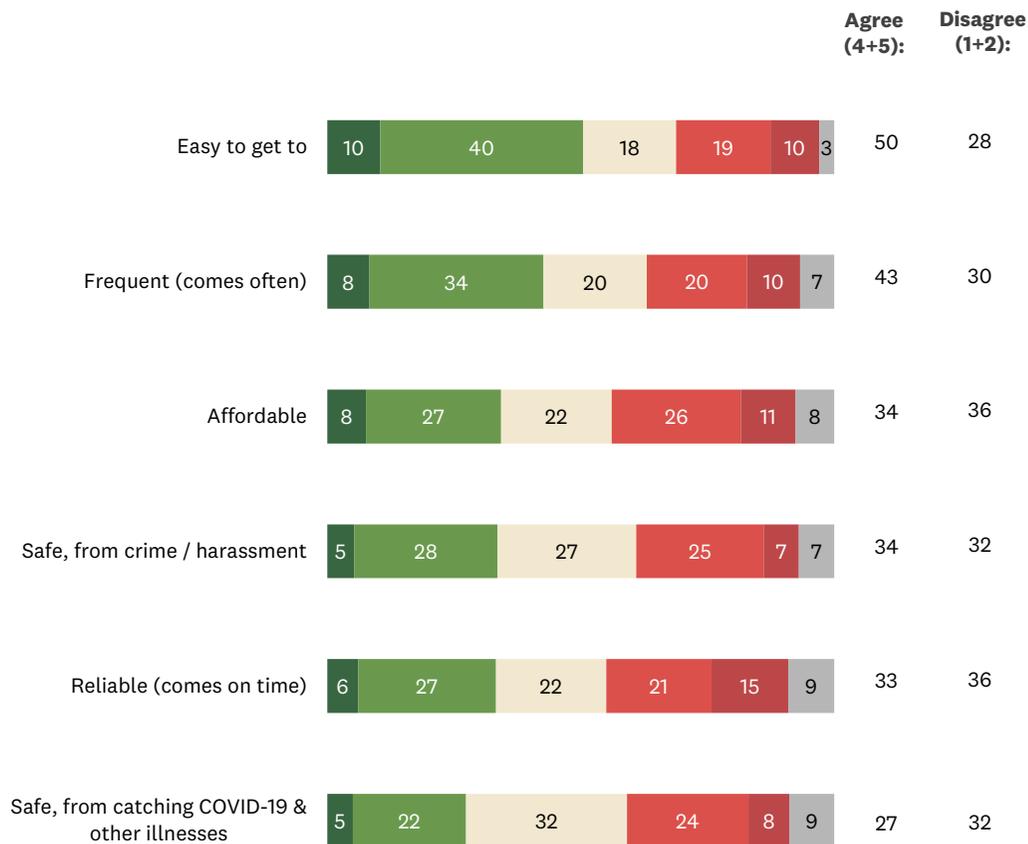

Those who have public transport in their area were asked about their perceptions of public transport.

Relatively large proportions of respondents agreed that public transport was ‘easy to get to’ (50%) and ‘frequent’ (42%).

One-third of respondents also agreed that public transport was ‘affordable’ (35%), ‘safe from crime / harassment’ (33%) and ‘reliable’ (33%).

Public transport was rated least positively for being ‘safe from catching Covid-19 and other illnesses’ (27%).

Perceptions of public transport (summary) – Auckland total (%)

Base: Those who did not select code 5 (not applicable in my local area] at Q12 (n=2453)

Source: Q13: Thinking about public transport in Auckland, based on your experiences and perceptions, do you agree or disagree with the following statements. *Public transport is...*

(1 – Strongly disagree, 2 – Disagree, 3 – Neither agree nor disagree, 4 – Agree, 5 – Strongly agree, 98 – Don't know)

Accessibility of public transport

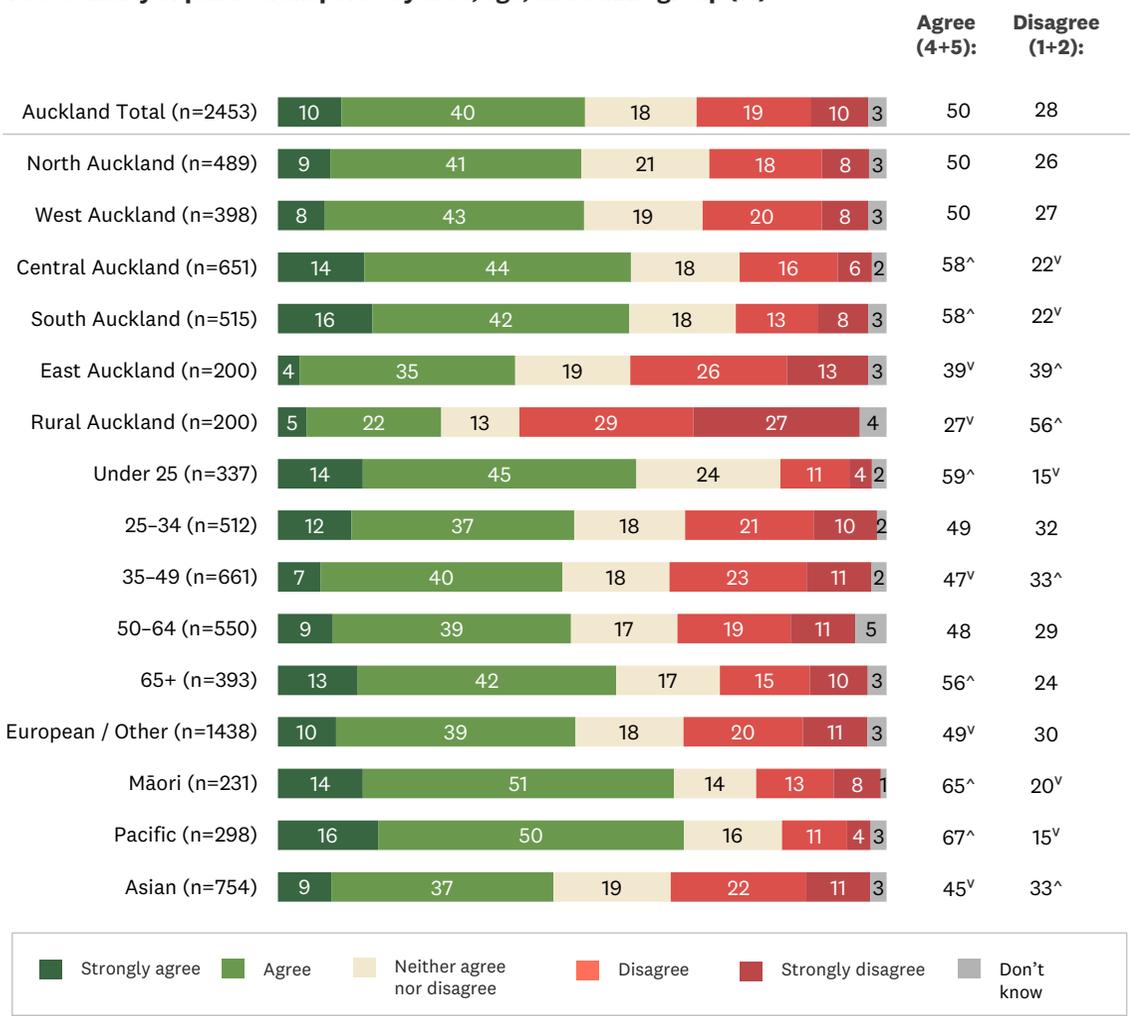

Half (50%) of the Auckland respondents agreed that public transport in Auckland was accessible.

Central (58%) and South Auckland (58%) respondents were more likely to agree that the city's public transport was accessible, while respondents from Rural (27%) and East Auckland (39%) were less likely to agree.

Auckland respondents aged under 25 (59%) and over 65 (56%) were significantly more likely than those in other age groups to report that Auckland's public transport was accessible.

Pacific (67%) and Māori respondents (65%) were more likely to agree that public transport was accessible, while European (49%) and Asian respondents (45%) were significantly less likely to agree that public transport was accessible.

Accessibility of public transport – by area, age, and ethnic group (%)

Frequency of public transport

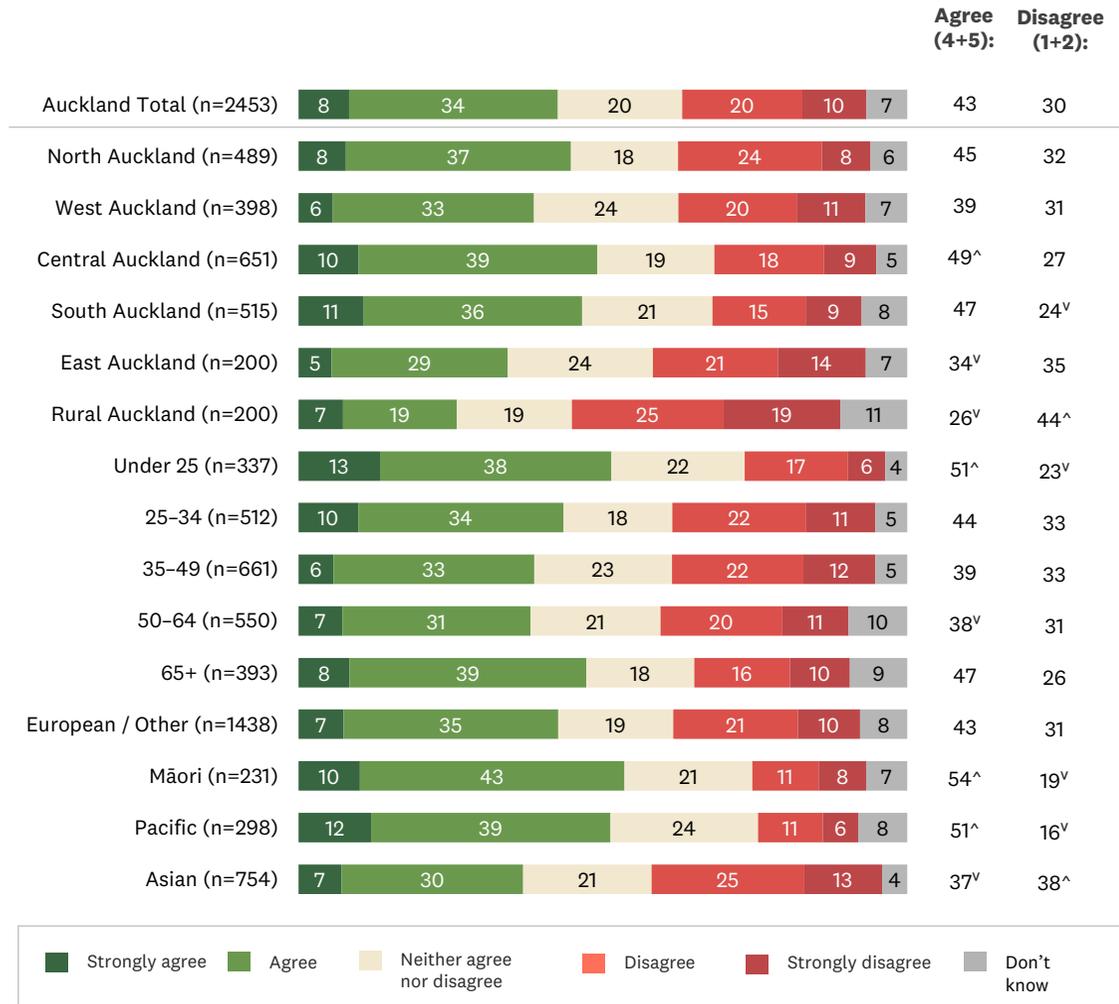

Fewer than half (43%) of Auckland respondents agreed that public transport is frequent, that is, it comes often.

Respondents in Central Auckland (49%) were significantly more likely to agree that public transport is frequent, while those living in East Auckland (34%) and Rural Auckland (26%) were less likely to agree.

Over half (51%) of respondents aged between 18 and 24 agreed that Auckland’s public transport was frequent. Those aged between 50 and 64 (38%) were significantly less likely to agree that public transport was frequent.

Māori (54%) and Pacific respondents (51%) were more likely to report that the city’s public transport was frequent, while Asian respondents (37%) were less likely to agree.

Frequency of public transport – by area, age, and ethnic group (%)

Base: Those who did not select code 5 (not applicable in my local area) at Q12 (n=2453)

(1 – Strongly disagree, 2 – Disagree, 3 – Neither agree nor disagree, 4 – Agree, 5 – Strongly agree, 98 – Don't know)

Affordability of public transport

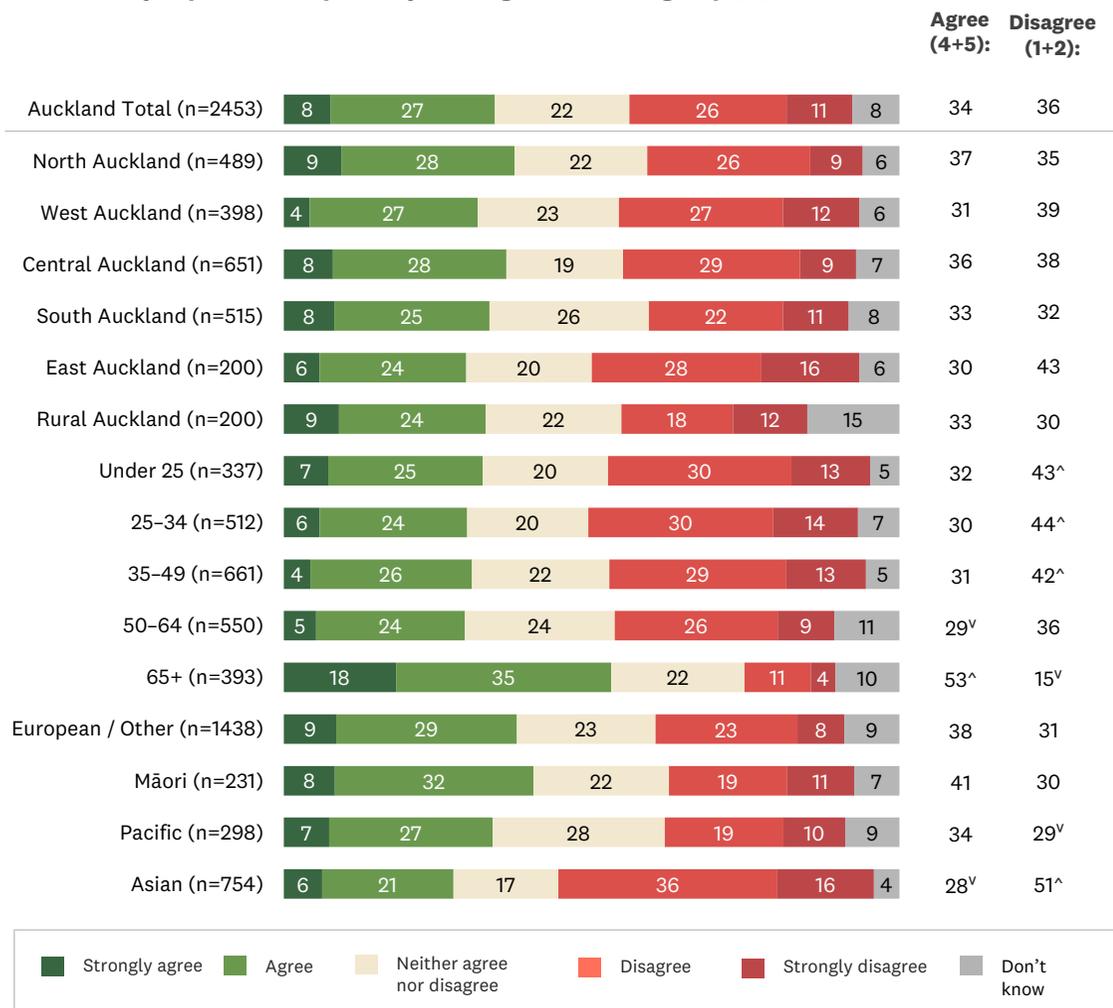

More than one-third (34%) of Auckland respondents agreed that the city’s public transport was affordable, although more than one-third (36%) also disagreed.

There were no significant differences in perceptions of affordability by area of residence.

Respondents under 50 years of age were more likely to disagree that public transport was affordable: 43 per cent of under 25s, 44 per cent of 25 to 34 year olds, and 42 per cent of those aged between 35 and 49. Older Aucklanders, aged 65 and over (53%), were more likely to agree that public transport was affordable.

Asian (51%) respondents were more likely to disagree that public transport was affordable.

Perceptions of Auckland’s transport system – summary

Respondents were asked their perception of the public transport system in Auckland.

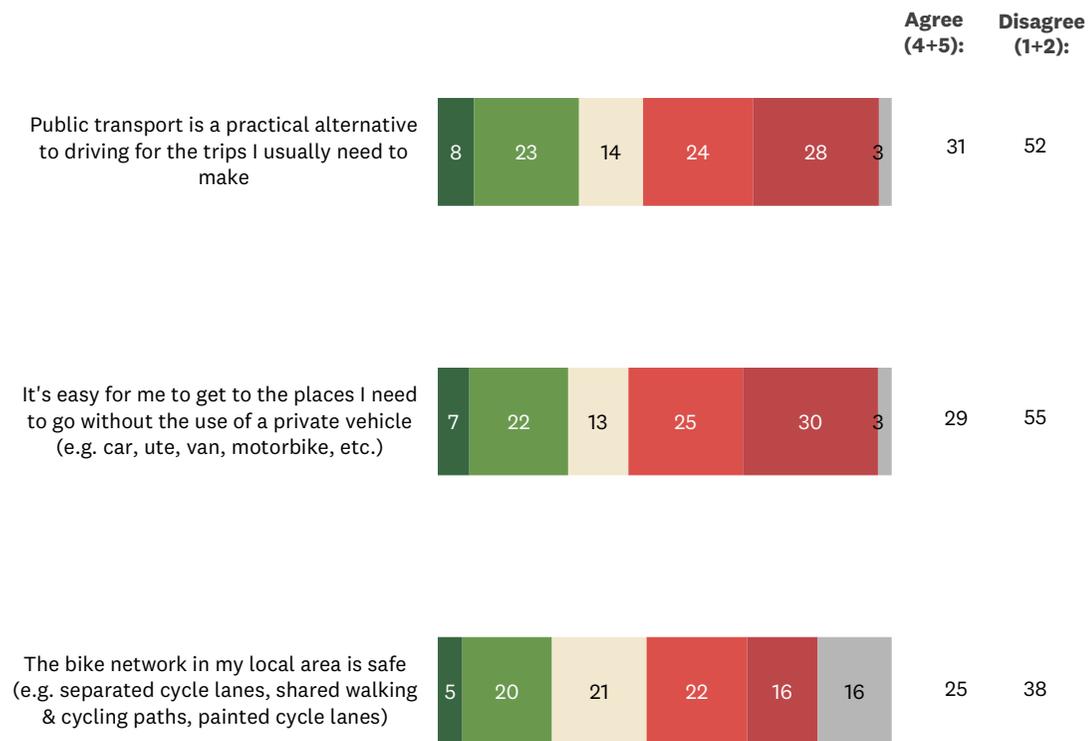

Although nearly one-third (31%) of Auckland respondents overall agreed that ‘public transport is a practical alternative to driving for the trips I usually need to make’, more than half (52%) disagreed.

Similarly, 29 per cent agreed that ‘it’s easy for me to get to the places I need to go without the use of a private vehicle’, while 55 per cent disagreed.

Regarding perceptions of bike network safety, one-quarter (25%) agreed that the ‘bike network in their local area is safe’, while 38 per cent disagreed that their local bike network was safe. Sixteen per cent of respondents said they did not know.

Note: This is a new question added in 2024.

Long-term and persistent difficulties – vision

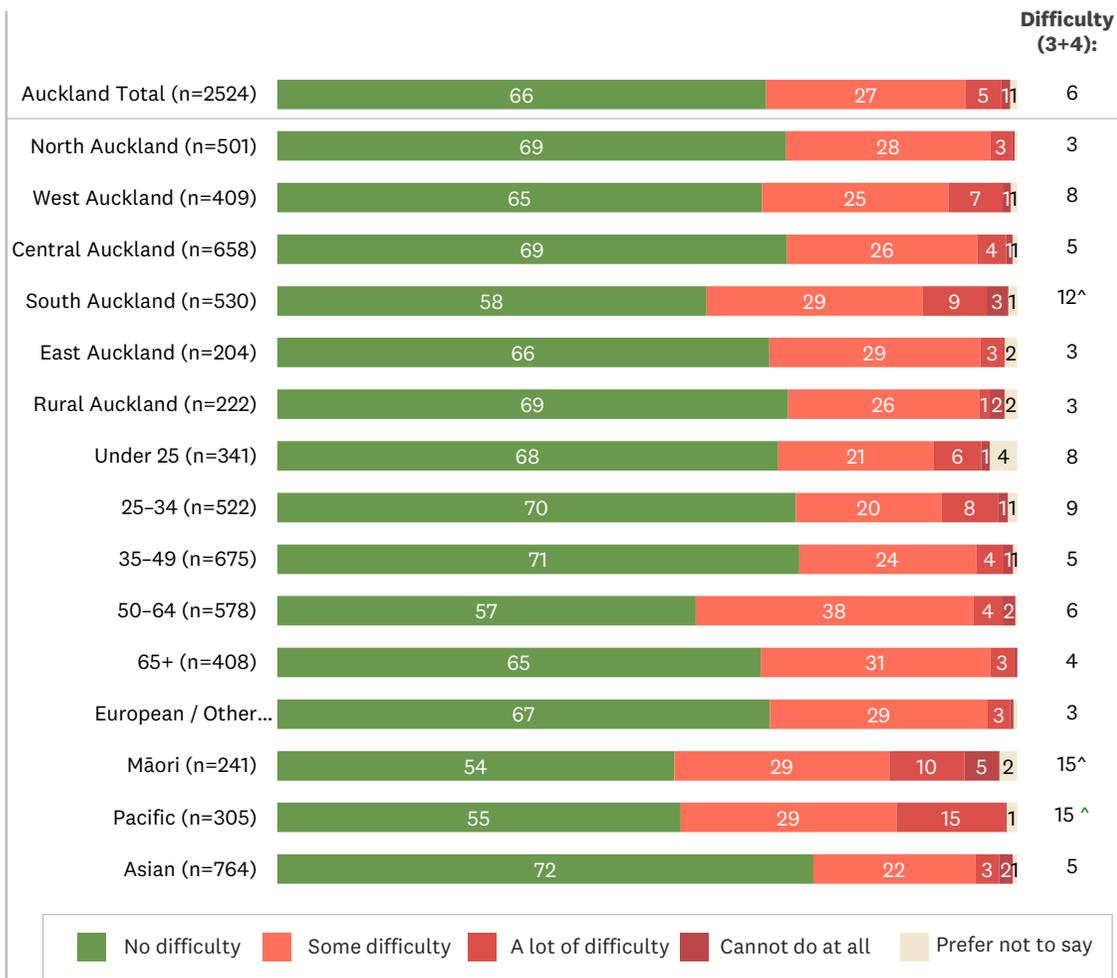

Six per cent of Auckland respondents said that they had long-term and persistent difficulty seeing, even if wearing glasses.

Respondents living in South Auckland (12%) were more likely than respondents from other parts of Auckland to say they experienced long-term and persistent difficulty with their vision.

Māori (15%) and Pacific Aucklanders (15%) were more likely to report difficulties with their vision than other ethnic groups.

There were no significant differences by age.

Vision difficulties – by area, age, and ethnic group (%)

Base: All respondents (excluding not answered)

Source: Q30_1: Do you have any long-term and persistent difficulty with any of the following activities? Seeing, even if wearing glasses

(1 – No difficulty, 2 – Some difficulty, 3 – A lot of difficulty, 4 – Cannot do at all, 97 – Prefer not to say)

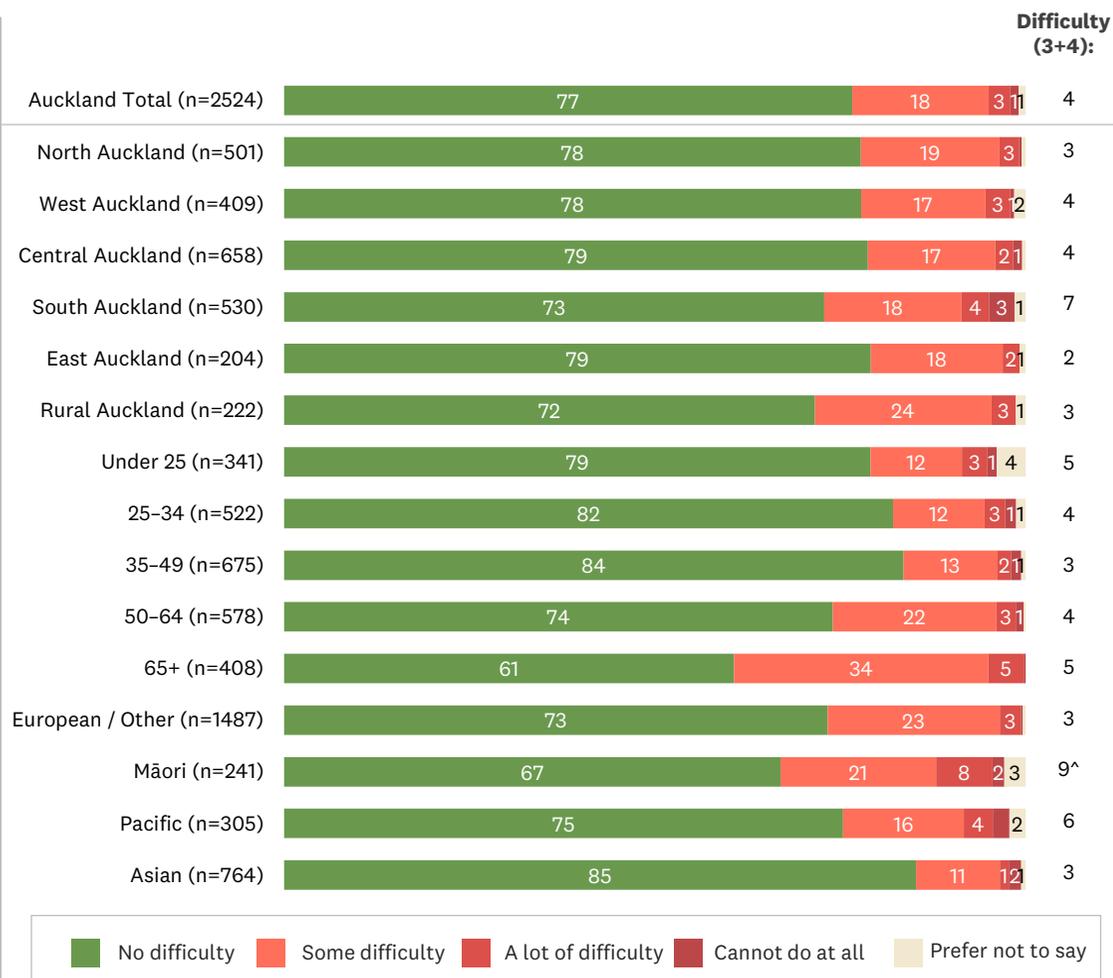

Long-term & persistent difficulties – hearing

Four per cent of Auckland respondents said they had long-term and persistent difficulty hearing, even if using a hearing aid.

Māori (9%) were more likely to report difficulties with their hearing, compared with other Aucklanders.

There were no significant differences by area of residence or age.

Hearing difficulties – by area, age, and ethnic group (%)

Base: All respondents (excluding not answered)

Source: Q30_2: Do you have any long-term and persistent difficulty with any of the following activities? Hearing, even if using a hearing aid

Long-term and persistent difficulties – self-care

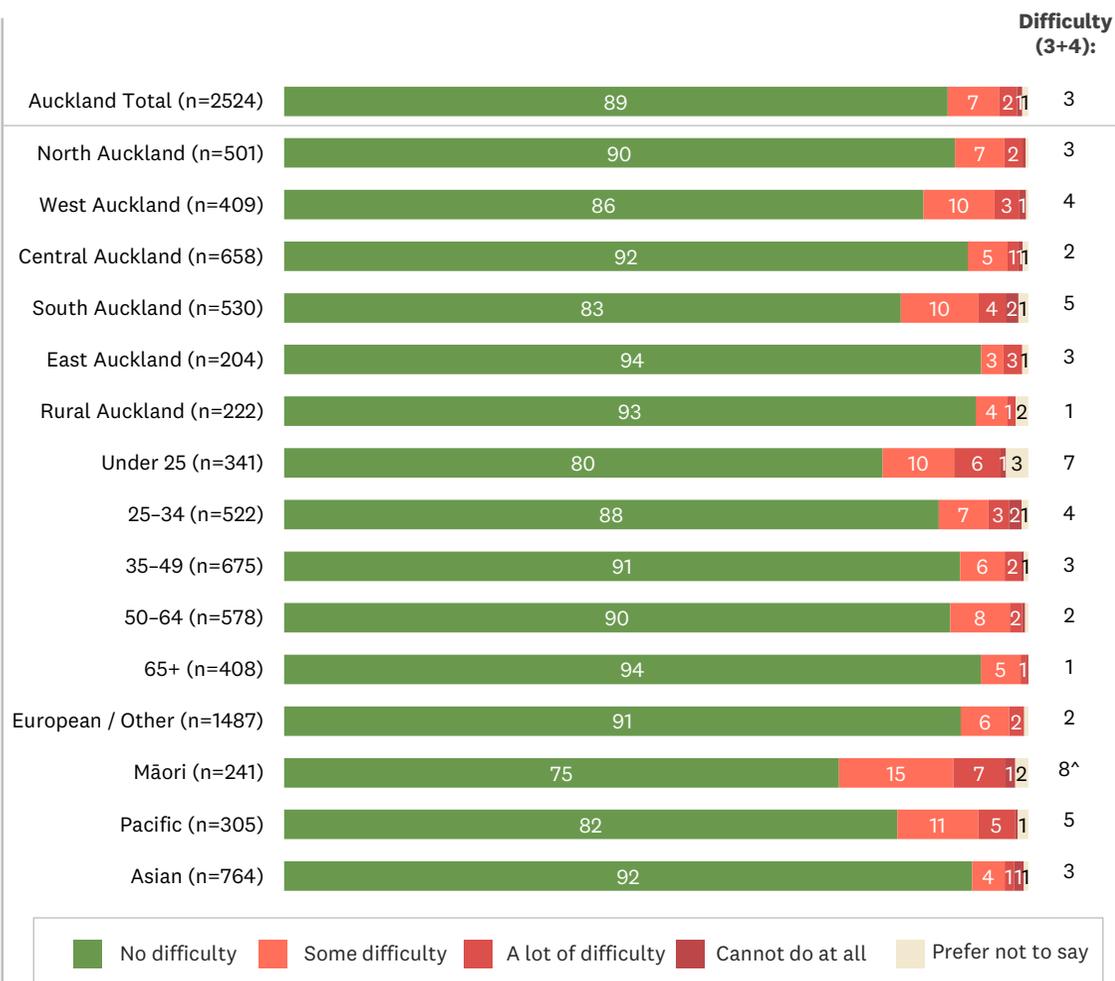

Most Auckland respondents (89%) said they did not have any long-term or persistent difficulty with self-care practices, such as washing all over and dressing.

Ten per cent of Auckland respondents said they had a degree of difficulty with self-care: 7 per cent had ‘some difficulty’, 2 per cent had ‘a lot of difficulty’ and 1 per cent ‘can not do at all’.

Seventeen per cent of young people under the age of 25 had some degree of difficulty with self-care.

Māori (23%) were more likely than those identifying with other ethnic groups to report some or a lot of difficulty with self-care.

Self-care difficulties – by area, age, and ethnic group (%)

Base: All respondents (excluding not answered)

Source: Q30_5: Do you have any long-term and persistent difficulty with any of the following activities?

Self-care, like washing all over or dressing

(1 - No difficulty, 2 - Some difficulty, 3 - A lot of difficulty, 4 - Cannot do at all, 97 - Prefer not to say)

Long-term and persistent difficulties – communication

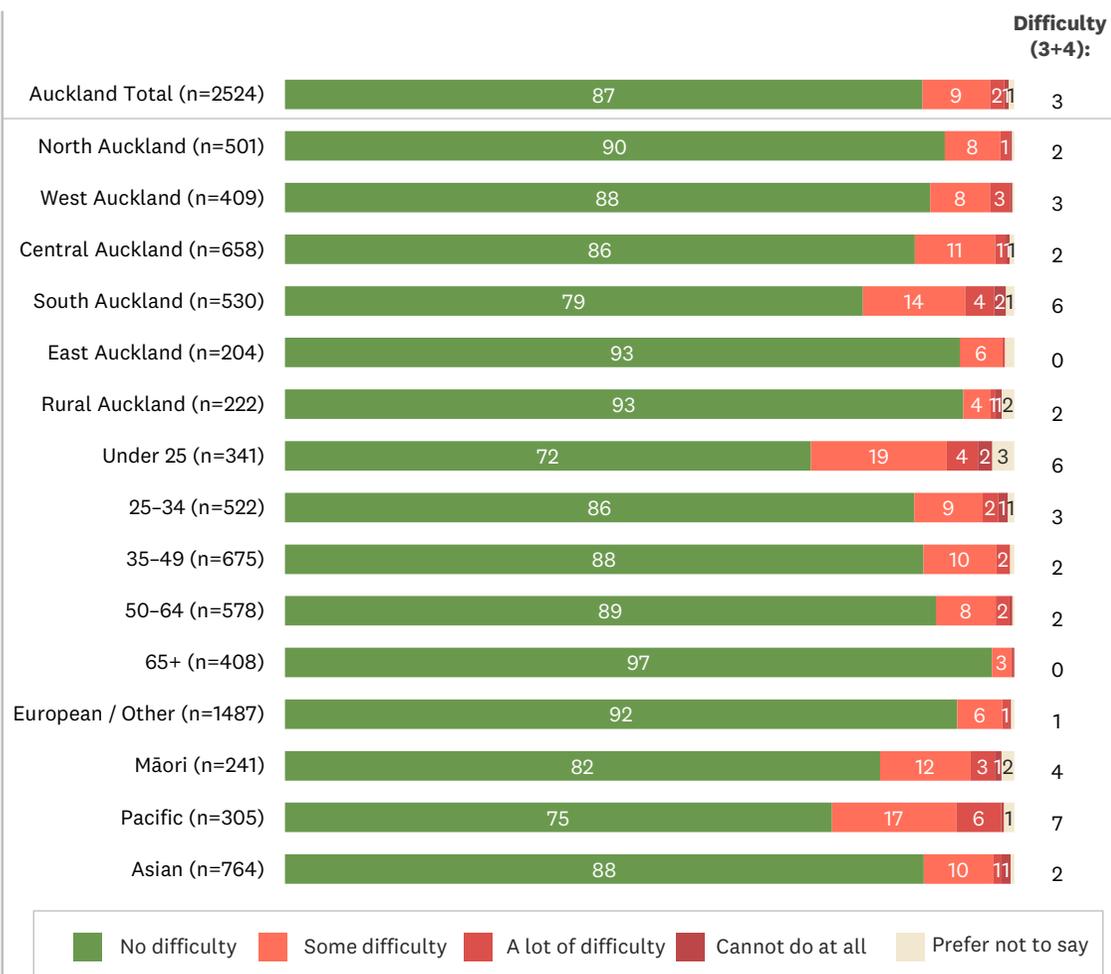

Twelve per cent of Auckland respondents said they experienced long-term and persistent difficulty (either ‘some difficulty’, ‘a lot of difficulty’ or ‘cannot do at all’) communicating in their everyday language, understanding or being understood by others.

Respondents living in South Auckland (20%) were more likely to report they had trouble communicating in their everyday language.

One-quarter (25%) of young people aged under 25 reported communication difficulties, significantly more than older cohorts.

Pacific (24%) and Māori respondents (17%) were more likely to report they had trouble communicating in their everyday language than those who identified with other ethnic groups.

Communication difficulties – by area, age, and ethnic group (%)

Base: All respondents (excluding not answered)

Source: Q30_6: Do you have any long-term and persistent difficulty with any of the following activities? WHATUNGA HAPORI, WHATUNGA PĀPŌRI / COMMUNITY & SOCIAL WELLBEING

This section reports on questions about social participation, sense of community, and connection with others. It also reports on perceptions of trust towards other people and of different institutions across Aotearoa / New Zealand.

Sense of community experienced

Forty-two per cent of Auckland respondents agreed that they felt a sense of community with others in their neighbourhood.

Respondents aged 65 and older (55%) were more likely to agree that they felt a sense of community in their local neighbourhood, while younger age groups were less likely to agree (around one-third of those aged between 18 and 34).

Seventeen per cent of Rural Auckland respondents and 19 per cent of Pacific respondents disagreed with the statement.

Social networks

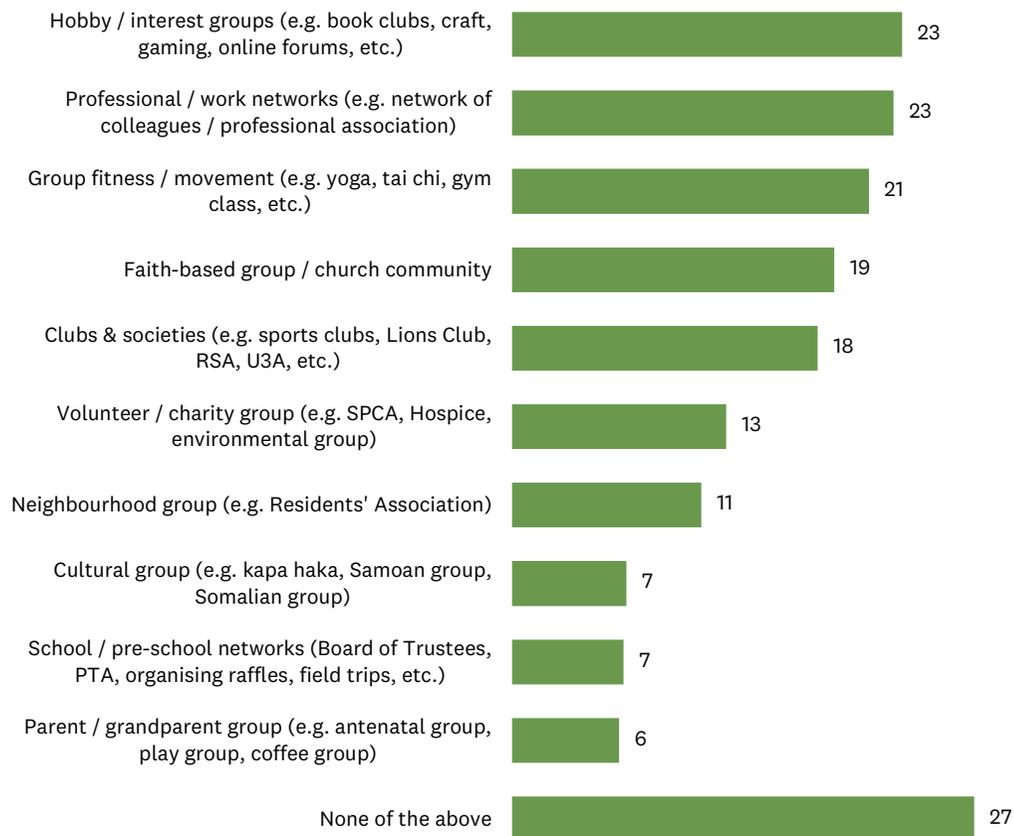

Auckland respondents were asked which of a series of social networks and groups they had been a part of in the previous 12 months.

Hobby/interest groups (23%) and professional/work networks (23%) were most common, followed by group fitness (21%), faith-based groups, including a church community (19%), and clubs and/or societies (18%).

Thirteen per cent of Auckland respondents said they participated in volunteer or charity work.

One-quarter (27%) said they did not belong to any of the nominated social networks and groups.

Source: Q26: Thinking about the social networks and groups you are part of or have been part of in the last 12 months (whether online or in person), do you belong to any of the following?

Note: Percentages are row based.

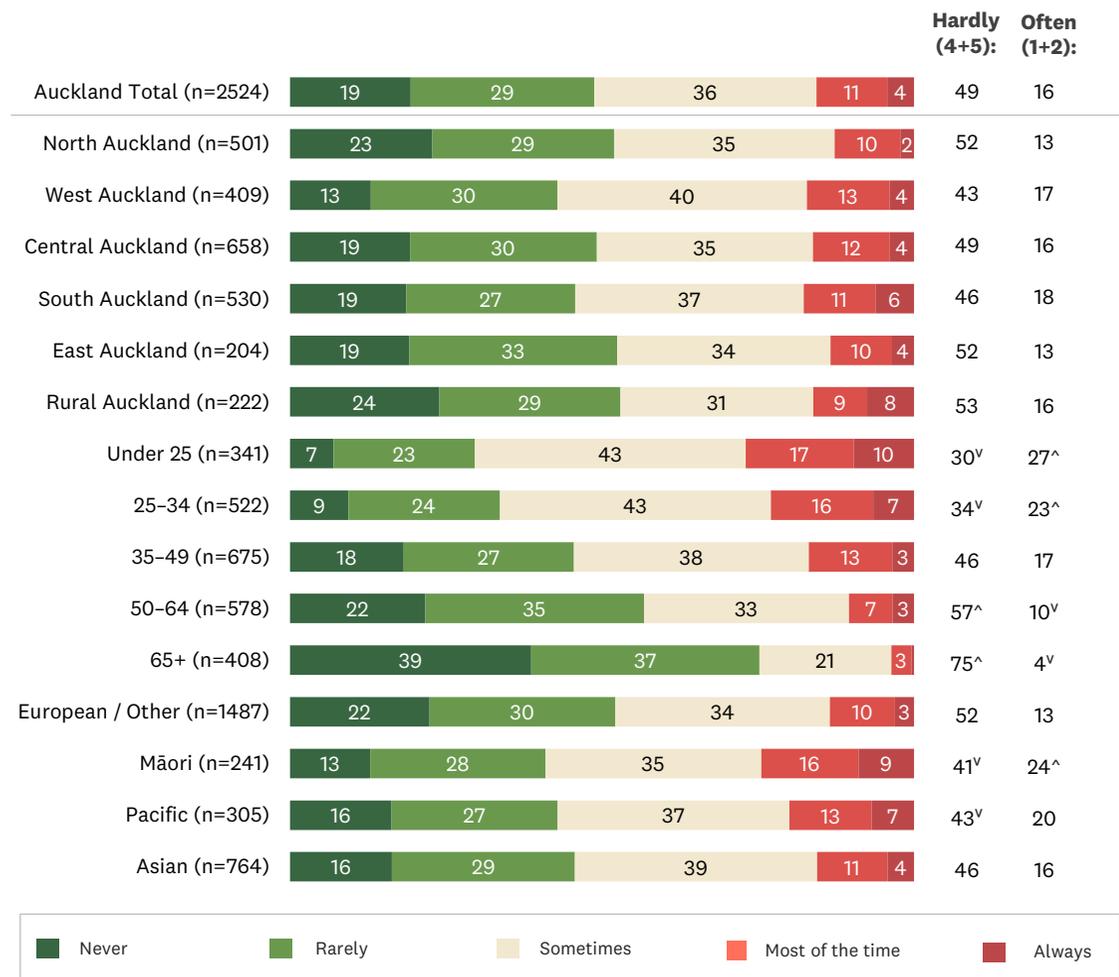

Loneliness / isolation

While nearly half (49%) of all Auckland respondents said they had rarely or never felt lonely or isolated in the previous 12 months, 16 per cent said they felt this way most or all of the time.

There were no significant differences by area of residence but feelings of loneliness and isolation were age related. Around one-quarter of those aged between 18 and 24 (27%) and 25 and 34 (23%) said they felt lonely or isolated most or all of the time. Only 4 per cent of respondents aged 65 and older felt this way.

Māori respondents (24%) were more likely than those who identified with other ethnic groups to say they felt lonely or isolated.

Feelings of loneliness / isolation in last 12 months – by area, age, and ethnic group (%)

Base: All respondents (excluding not answered)

Source: Q27: Over the last 12 months, how often, if ever, have you felt lonely or isolated?

(1 – Always, 2 – Most of the time, 3 – Sometimes, 4 – Rarely, 5 – Never)

Interpersonal trust

Over half (53%) of Auckland respondents said they trusted people in their local area, while just 18 per cent said they did not.

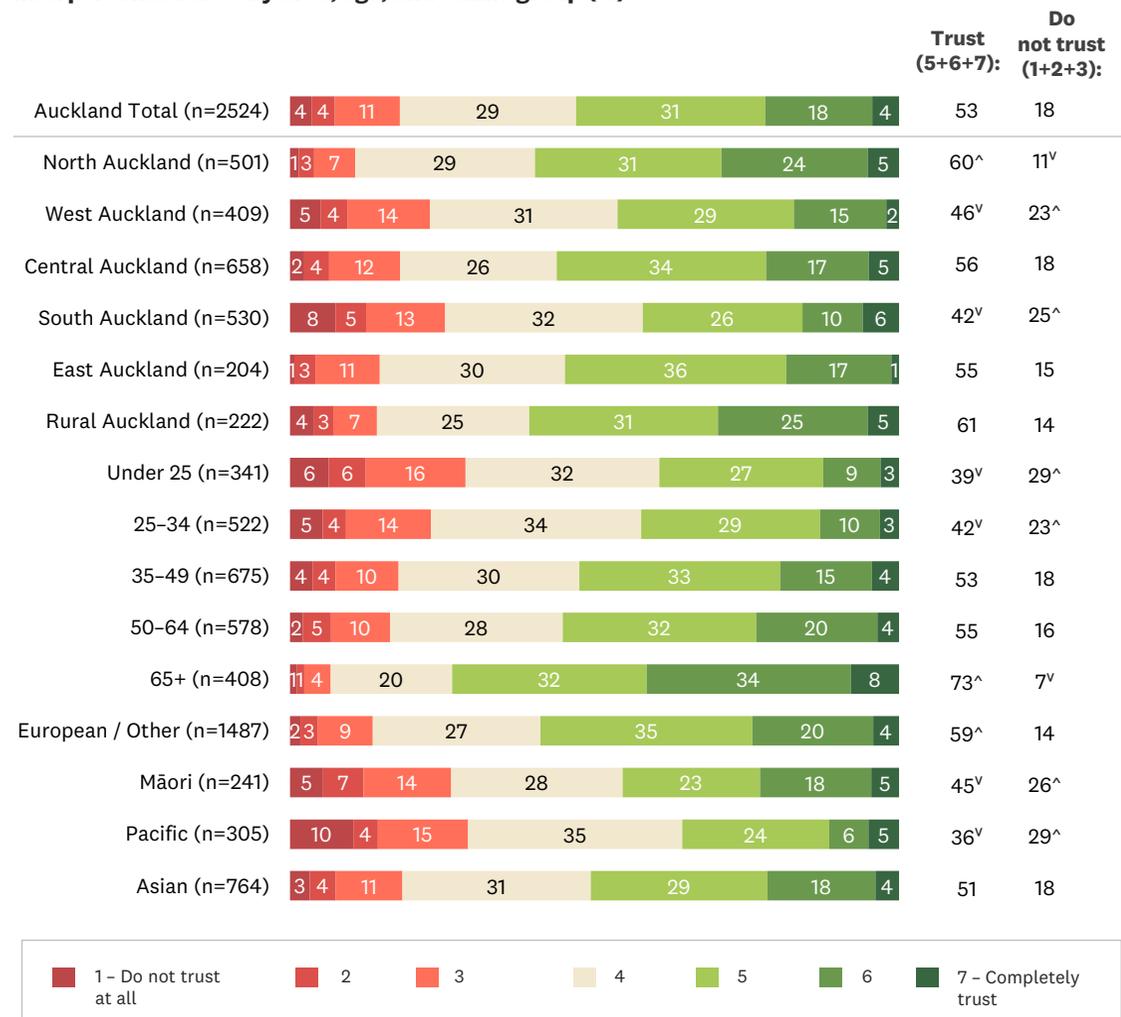

Respondents living in North Auckland (60%) were more likely to report they trusted people in their neighbourhood, while those living in West (46%) and South Auckland (42%) were less likely to report this was the case.

Respondents aged 65 and older (73%) reported the highest levels of trust. In contrast, those aged between 18 and 34 were more likely than others to say they did not trust people in their local area.

Māori (26%) and Pacific respondents (29%) were more likely to report that they did not trust people in their local area, while European (59%) respondents were more likely to say they did.

Note: This is a new question added in 2024.

WHATUNGA AHUREA / CULTURE & IDENTITY

This section explores respondents' views of their culture and identity in Auckland, including how accepted and valued they feel, and experiences of discrimination.

Perceptions of acceptance in Auckland

Respondents were asked how much they agreed or not with the statement: 'People in Auckland accept and value me and others of my identity (e.g. sexual, gender, ethnic, cultural, faith)'.

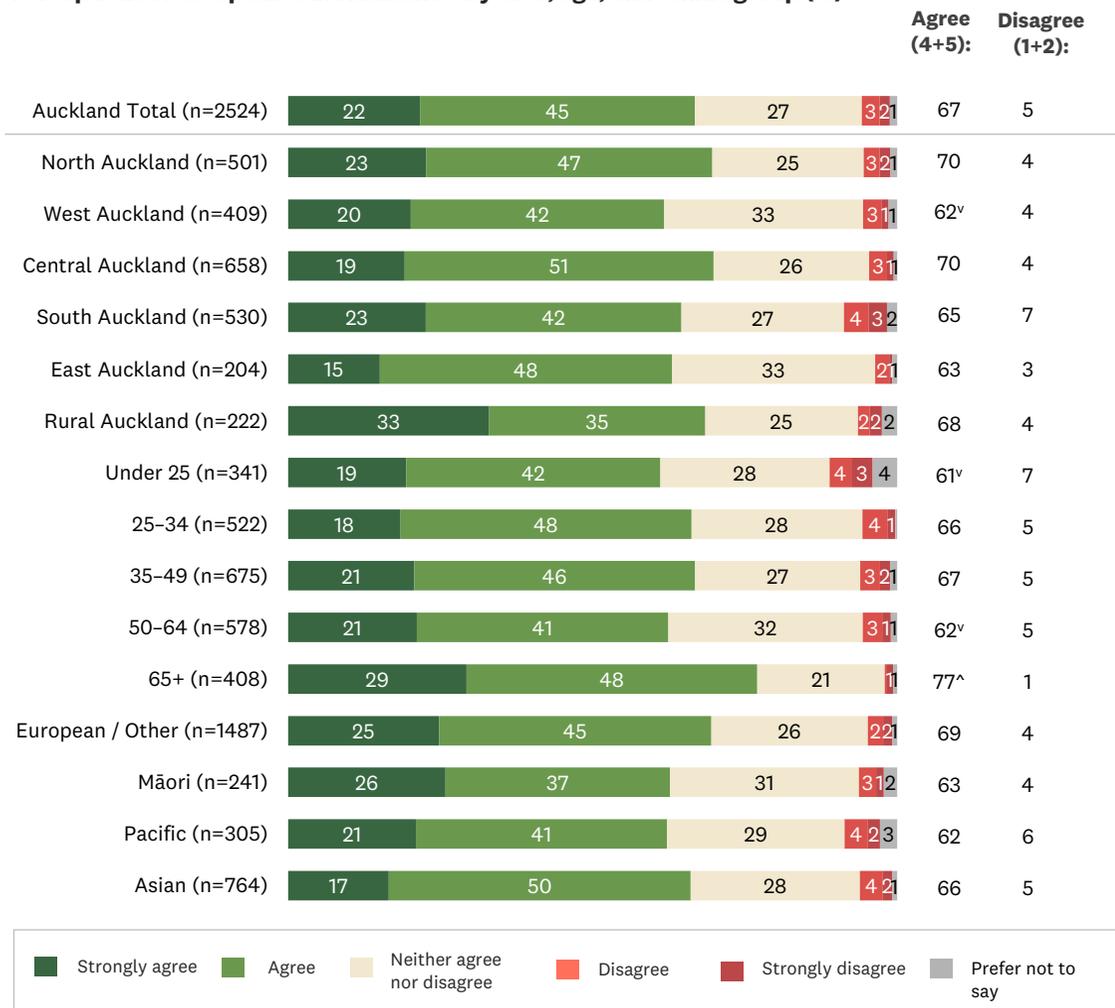

Two-thirds (67%) of Auckland respondents said they agreed with the statement. While only 5 per cent disagreed with the statement, a further 27 per cent neither agreed nor disagreed.

Respondents living in West Auckland (62%) were less likely than other respondents to agree they felt accepted and valued.

Older Auckland respondents (aged 65 and over; 77%) were more likely to say they felt accepted and valued, compared with other age groups.

There were no significant differences by ethnicity.

Perceptions of acceptance in Auckland – by area, age, and ethnic group (%)

Base: All respondents (excluding not answered)

Source: Q35_1: Thinking about living in Auckland, how much do you agree or disagree with the following statements? People in Auckland accept and value me and others of my identity (e.g. sexual, gender, ethnic, cultural, faith)

(1 – Strongly disagree, 2 – Disagree, 3 – Neither agree nor disagree, 4 – Agree, 5 – Strongly agree, 97 – Prefer not to say)

Comfort with dressing to express identity in public

Respondents were asked how comfortable they felt dressing in a way that expresses their identity in public, including their sexual, gendered, ethnic, cultural, and faith-based identity.

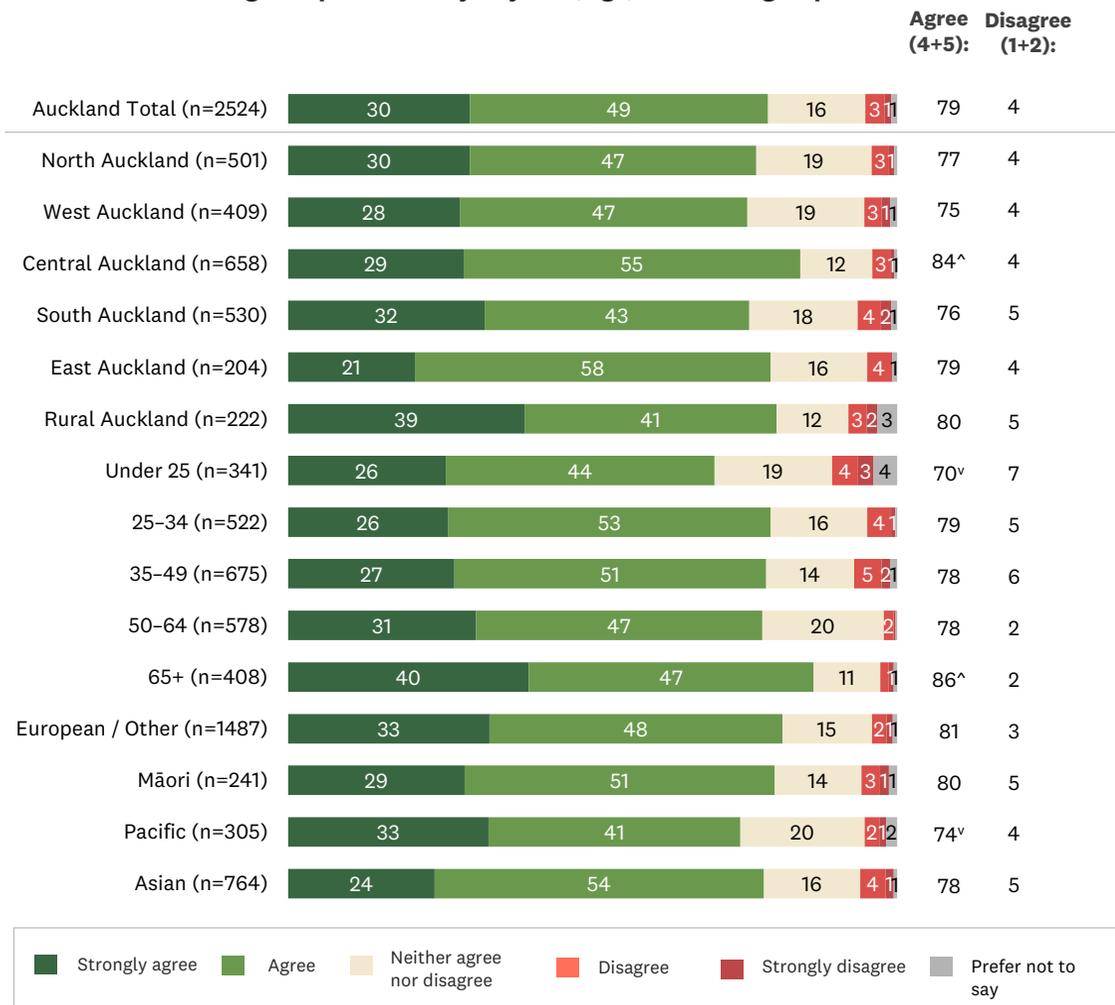

Seventy-nine per cent agreed that they felt comfortable, while 4 per cent disagreed.

Respondents living in Central Auckland (84%) were significantly more likely to report their agreement.

Older respondents aged 65 and over (86%) were more likely to report their agreement, while those aged under 25 (70%) were less likely to do so.

Pacific respondents (74%) were less likely than other ethnic groups to report that they felt comfortable dressing in a way that expresses their identity in public.

Comfort with dressing to express identity – by area, age, and ethnic group (%)

Source: Q35_2: Thinking about living in Auckland, how much do you agree or disagree with the following statements? I feel comfortable dressing in a way that expresses my identity in public (e.g. sexual, gender, ethnic, cultural, faith)

(1 - Strongly disagree, 2 - Disagree, 3 - Neither agree nor disagree, 4 - Agree, 5 - Strongly agree, 97 - Prefer not to say)

Ability to participate in own cultural activities

Respondents were asked how much they agreed or not that they could attend, participate or perform in, activities or groups that align with their culture.

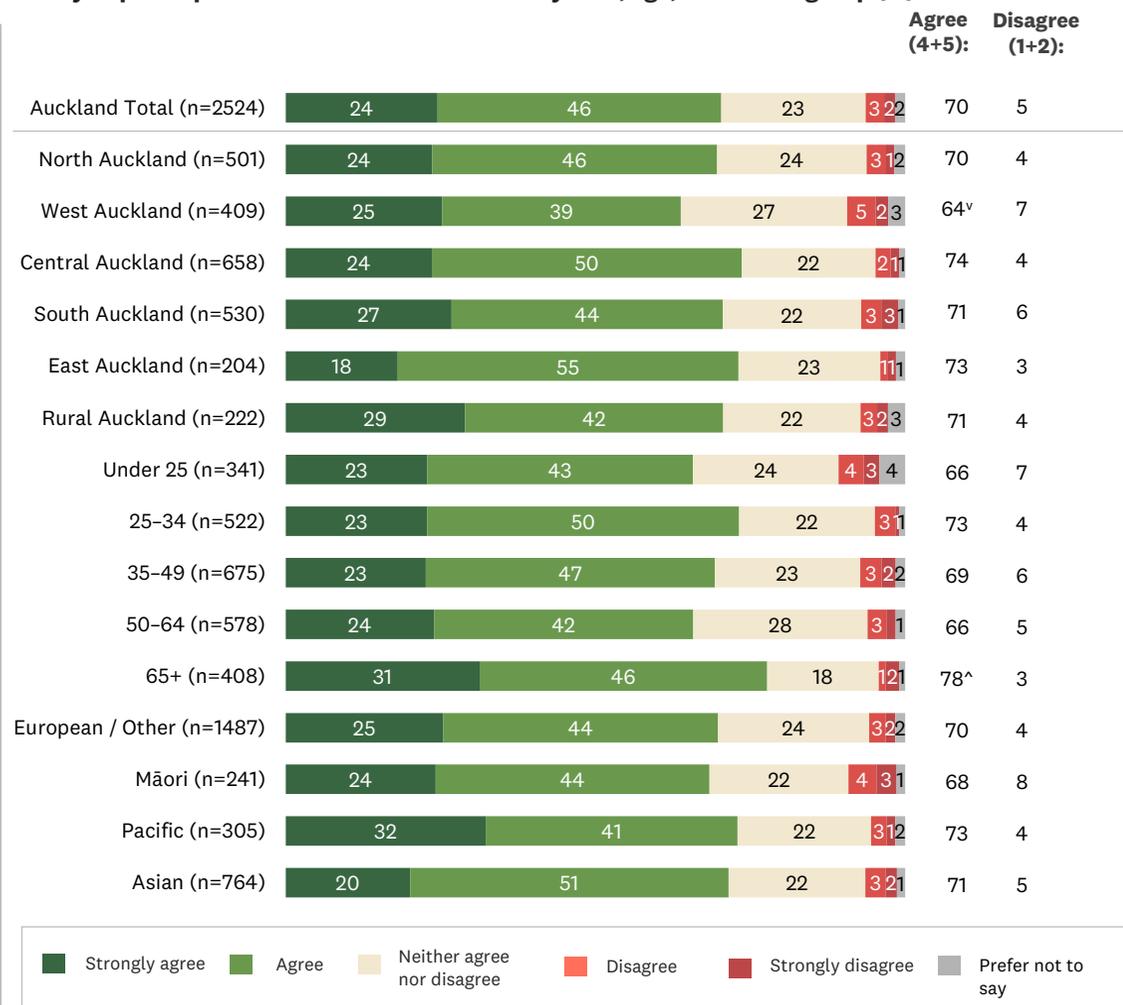

Seven out of ten (70%) said they felt comfortable, while 5 per cent said they did not.

Respondents living in West Auckland (64%) were less likely than those living in other parts of Auckland to agree that they could participate in cultural activities.

Those aged 65 and older (78%) were more likely to agree that they could participate in activities that aligned with their own culture.

There were no significant differences by ethnicity.

Ability to participate in own culture activities - by area, age, and ethnic group (%)

Base: All respondents (excluding not answered)

Source: Q35_3: Thinking about living in Auckland, how much do you agree or disagree with the following statements?

I can participate, perform, or attend activities or groups that align with my culture

(1 - Strongly disagree, 2 - Disagree, 3 - Neither agree nor disagree, 4 - Agree, 5 - Strongly agree, 97 - Prefer not to say)

Racism and discrimination towards others

Forty-five per cent of Auckland respondents overall said that racism or discrimination towards particular groups of people had been an issue in their local area in the previous 12 months.

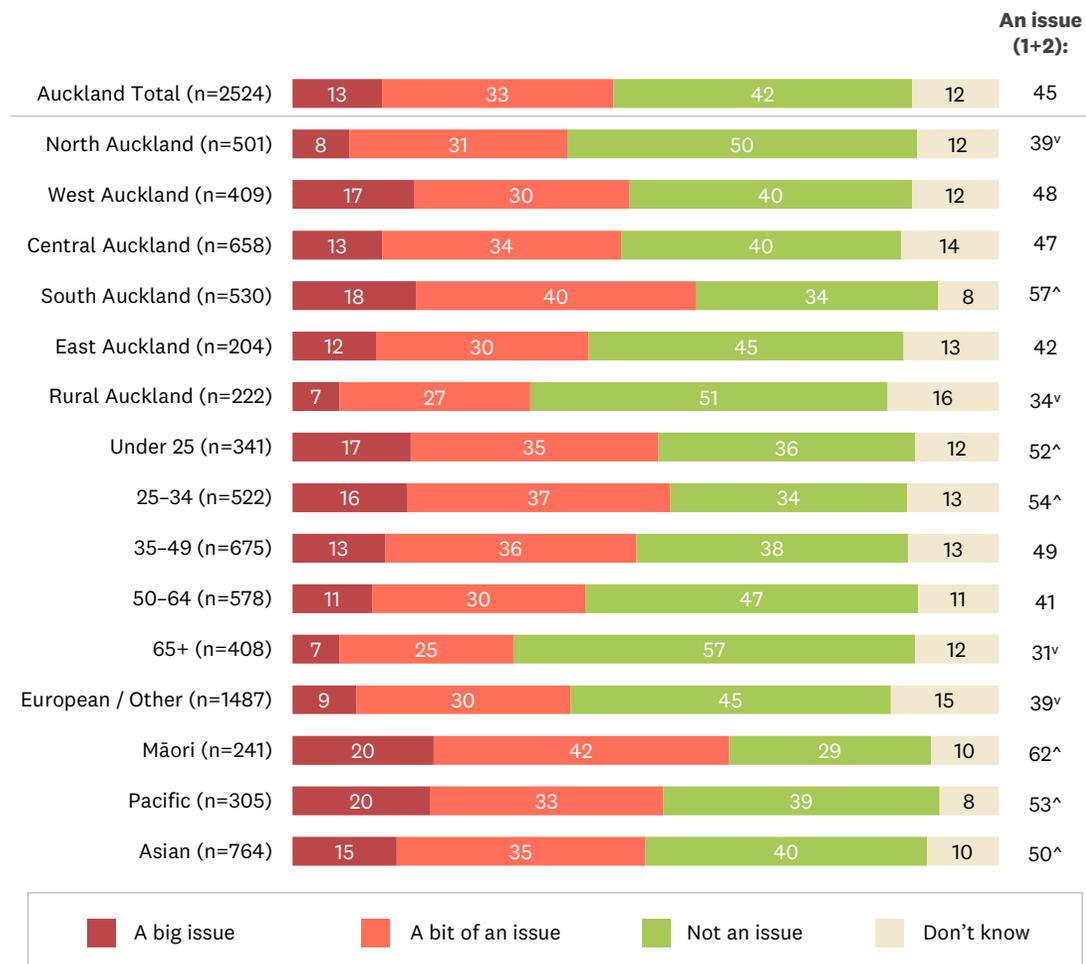

South Auckland-based respondents (57%) were more likely than others to report that racism or discrimination had been an issue.

Younger respondents aged between 18 and 34 were significantly more likely to report that racism and discrimination had been an issue; more than half said it had been an issue.

Māori (62%), Pacific (53%) and Asian (50%) respondents were significantly more likely to report that this had been an issue, while European respondents (39%) were significantly less likely.

Note: This question has changed in 2024 - previous QoL surveys asked whether respondents thought it had been a 'problem' rather than an 'issue' in their local area.

Perceived racism and discrimination in local area – by area, age, and ethnic group (%)

Base: All respondents (excluding not answered)

Source: Q11.5: Thinking about the following social issues, to what extent, if at all, has each of the following been an issue in your local area over the past 12 months? *Racism or discrimination towards particular groups of people*

(1 – A big issue, 2 – A bit of an issue, 3 – Not an issue, 98 – Don't know)

Personal experience of anger / intolerance

Fifteen per cent of Auckland respondents reported that they had personally experienced anger or intolerance, or been treated unfairly or excluded, because of their ethnicity, over the three months prior to the survey.

Eight per cent had personally experienced anger or intolerance, or been treated unfairly or excluded, because of their age (8%) or gender (8%), or because of a physical or mental health condition (8%).

Personal experience of prejudice, intolerance or unfair treatment due to other factors such as religious beliefs (6%) or sexual orientation (4%) were less widespread.

Satisfaction with work-life balance

Of those respondents who said they were in full- or part-time paid work, 58 per cent said they were satisfied with the balance between their paid work and other aspects of their life.

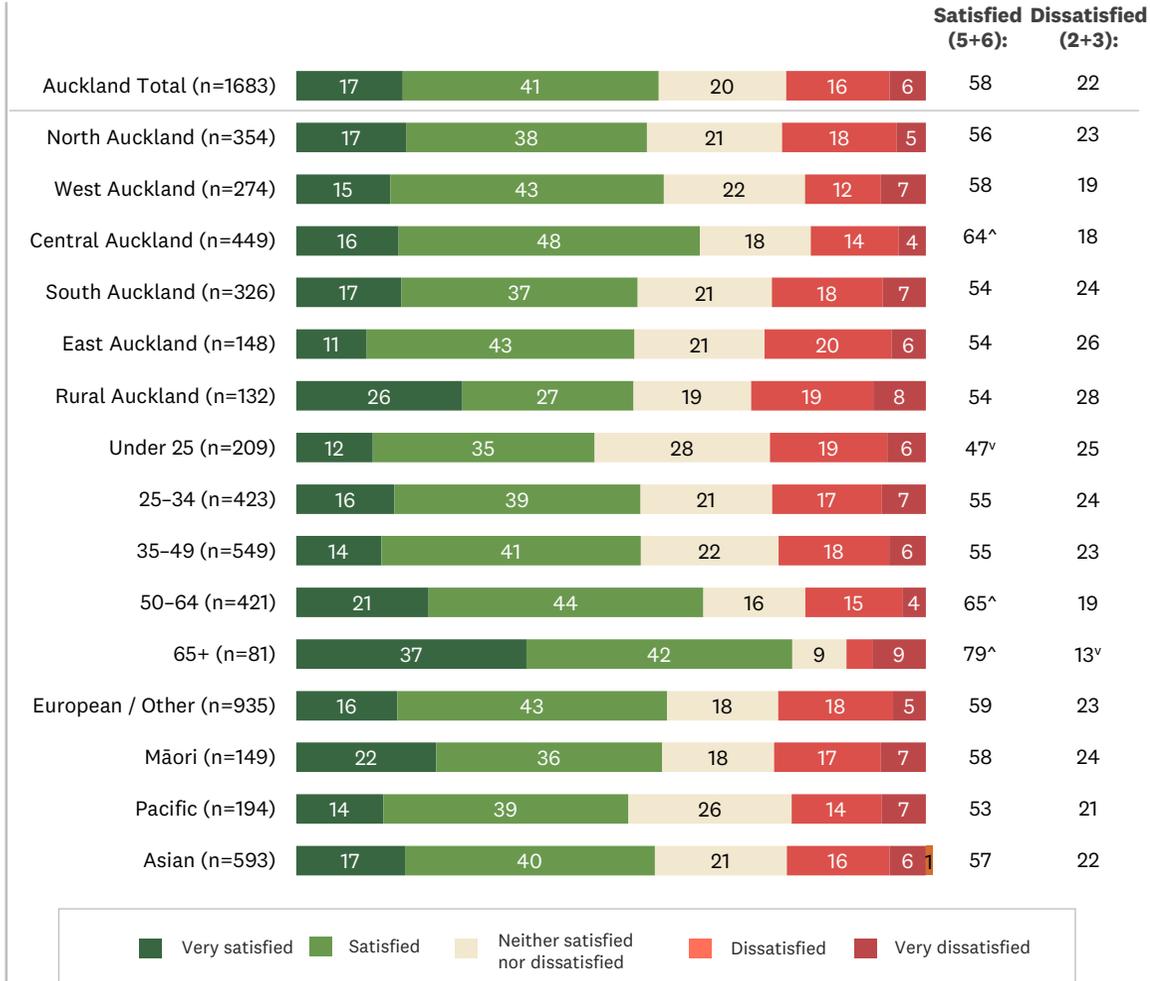

Respondents living in Central Auckland (64%) were more likely to say they were satisfied with their work-life balance.

Older respondents aged 50 and over were more likely to report their satisfaction with work-life balance.

This was especially the case for those aged 65 and older (79%). Those aged 18 to 25 were significantly less likely to report their satisfaction.

There were no significant differences by ethnicity.

Work-life balance satisfaction – by area, age, and ethnic group (%)

Base: Those in paid employment (n=1678)

Source: Q18: Overall, how satisfied or dissatisfied are you with the balance between your paid work and other aspects of your life such as time with your family or for leisure?

Reasons for being satisfied with work-life balance – verbatim comments

Of the 901 respondents who said they were satisfied with their work-life balance, the most common explanations were workload and manageable hours (30%), good balance and time management (24%), having enough time for themselves and their other commitments (22%), and that their work affords them flexibility (22%). Being happy with their job (19%) and having a sufficient income (8%) were also cited.

“I work for myself and make conscious decisions to be home with the family and to give myself time to de-stress, more simplified life.”

Male, 50–64 years

“I can work from home 2 days a week which means it’s easier to get household chores done while also working. This frees up time on the weekends/evenings to spend with family.”

Female, 35–49 years

“I have the choice to work flexibly (i.e. start late to go to an appointment, or work from home for one day if I need to take my car in) when I need to. The culture at my work also doesn’t promote overtime. I work consistent hours which helps me plan my other activities.”

Female, 18–24 years

“I have the flexibility to work different hours and have supportive management. My working hours fit in with looking after my children and their extra curricular activities.”

Female, 35–49 years

“I am able to spend time with my child and wife in the morning and after work, while also being able to relax with family and have private time by myself in the weekend. My job also enables me to primarily work from home with very few trips away.”

Male, 18–24 years

“My current workplace is very flexible in terms of having a healthy work-life balance. We have a hybrid working policy, as well as even more flexibility on days that you do need to come into the office. It’s been a big help with getting chores done around at home, so that more time on the weekend is spent socialising/relaxing.”

Male, 25–34 years

Note: This is a new question added in 2024.

Base: All respondents who said they were satisfied with work-life balance (n=901)

Source: Q19b: And why did you say that?

Reasons for being dissatisfied with work-life balance – verbatim comments

Of the 364 respondents who said they were dissatisfied with their work-life balance, more than half (52%) attributed this to workload and unmanageable hours.

Insufficient income (42%) and not having enough time for themselves and other commitments (38%) were also commonly cited as reasons for their dissatisfaction.

Stress, fatigue, or poor health (13%), issues travelling to work (13%), and a lack of flexibility in their workplace (12%) were also mentioned.

“We get paid well only after working hard in office and don’t get time on a daily basis to look after my daughter and help her with her studies and her other interests. Quality time to family is very much compromised especially in my role.”

Female, 35–49 years

“I live rurally to get a better quality of life however need to work fulltime in the city to afford that life. I spend 12 hours of every day made up of being at work and commuting meaning there is little time when I get home for quality time.”

Female, 35–49 years

“I feel like I work more hours but still get paid less and since I work more to earn more, the time I spend with myself, friends and family gets sacrificed.”

Male, 25–34 years

“At this stage in my life I’d expect more family or personal time. The high cost of living, including more taxes and tax rate increases, in Auckland and NZ has meant I must remain employed full-time to retain a basic lifestyle and achieve eventual retirement capability much later in life than I expected. It has also resulted in home relocation to more affordable housing options that unfortunately result in substantial work travel time. This reduces the amount of time for personal contact I have with remote family members who relocated outside NZ for these same reasons.”

Male, 65+ years

“Work longer hours than I’d like, particularly with commute. Haven’t been able to commit to social sports as often urgent work comes up.”

Female, 35–49 years

Base: All respondents who said they were dissatisfied with work-life balance (n=364)

OPENING DEMOGRAPHICS

Firstly a few questions about you.

Q1 Which area of Tāmaki Makaurau / Auckland do you live in?

Please select the area of Tāmaki Makaurau / Auckland where your home suburb is situated. You can refer to the map if you're not sure

	Please select one answer	
North Auckland	1	
West Auckland	2	
Central Auckland	3	
South Auckland	4	
East Auckland	5	
Rural Auckland (incl. Aotea/Great Barrier)	6	
I don't know which area contains my home suburb	98	→ Show suburb list
I don't live within the area shown on the map	99	→ Thank and end survey

D1 Are you... Please select **one** answer

Male	1
Female	2
Another gender	3
Prefer to self-describe (please specify)	4
Prefer not to say	97

D2 Which ethnic group, or groups, do you belong to? Please select **all** that apply

New Zealand European	1
Māori	2
Samoan	3
Cook Islands Māori	4
Tongan	5
Niuean	6
Chinese	7
Indian	8
Filipino	9
Korean	10
Other (please specify)	96
Prefer not to say	97
Don't know	98

QD3 Are you... Please select **one** answer

Less than 18 years	1	→ Thank and end survey
18-19 years	2	
20-24 years	3	
25-29 years	4	
30-34 years	5	
35-39 years	6	
40-44 years	7	
45-49 years	8	
50-54 years	9	
55-59 years	10	
60-64 years	11	
65-69 years	12	
70-74 years	13	
75+ years	14

QUALITY OF LIFE

Firstly, just a few questions about your quality of life in general. Please think about how you feel about your life when answering this question.

Q2 Would you say that **your** overall quality of life is...

Please select **one** answer

Extremely poor	1
Very poor	2
Poor	3
Neither poor nor good	4
Good	5
Very good	6
Extremely good	7

Q3 Compared to 12 months ago, would you say your quality of life has...

Please select **one** answer

Decreased significantly	1
Decreased to some extent	2
Stayed about the same	3
Increased to some extent	4
Increased significantly	5

→ Skip to Q5

Q4 Why do you say your quality of life has changed in the last 12 months? Please be as detailed as possible

THE CITY / AREA YOU LIVE IN

Now some questions about what it has been like living in your local area over the past 12 months.

Q5 How much do you agree or disagree with the following statements?

Please select **one** answer for each statement

	Strongly disagree	Disagree	Neither	Agree	Strongly agree
I feel really happy with the way my local area looks and feels	1	2	3	4	5
My local area is a great place to live	1	2	3	4	5

Q6 And in the last 12 months, do you feel your local area has become better, worse or stayed the same as a place to live?

Please select **one** answer

Much worse	1
Slightly worse	2
Stayed the same	3
Slightly better	4
Much better	5

→ Skip to Q8

Q7 Why do you say your local area has changed in the last 12 months as a place to live? Please be as detailed as possible

Q8 This question is about the home you currently live in. How much do you agree or disagree that: Please select **one** answer for each statement

	Strongly disagree	Disagree	Neither	Agree	Strongly agree	Don't know
Your housing costs are affordable (by housing costs we mean things like rent or mortgage, rates, house insurance and house maintenance)	1	2	3	4	5	6
The home you live in suits the needs of everyone in your household	1	2	3	4	5	6
The general area or neighbourhood your home is in suits the needs of everyone in your household	1	2	3	4	5	6

LOCAL ISSUES

Now we will ask you some questions about issues in your local area.

Q9 In general, how safe or unsafe would you feel in the following situations... Please select **one** answer for each situation

	Very unsafe	A bit unsafe	Fairly safe	Very safe	Don't know / not applicable
Walking in your neighbourhood after dark	1	2	3	4	5
In your city centre during the day	1	2	3	4	5
In your city centre after dark	1	2	3	4	5

Q9b Which area do you regard as your 'city centre'? Please write below

Council Processes

Q10 To what extent, if at all, has each of the following been a problem in your local area over the past 12 months?

Please select **one** answer for each statement

	A big problem	A bit of a problem	Not a problem	Don't know
Vandalism, such as graffiti or tagging, or broken windows in shops and public buildings	1	2	3	4
Theft and burglary (e.g. car, house)	1	2	3	4
Dangerous driving, including drink driving and speeding	1	2	3	4
Traffic congestion	1	2	3	4
Rubbish or litter dumped in public areas (e.g. on streets, vacant areas, in parks)	1	2	3	4
Noise pollution during the day	1	2	3	4
Noise pollution at night	1	2	3	4
Limited parking in your local area	1	2	3	4
Limited parking in the city centre	1	2	3	4

Q11 Thinking about the following social issues, to what extent, if at all, has each of the following been an issue in your local area over the past 12 months?

Please select **one** answer for each statement

	A big issue	A bit of an issue	Not an issue	Don't know
People you feel unsafe around because of their behaviour, attitude or appearance	1	2	3	4
Alcohol or drug problems or anti-social behaviour associated with the use of alcohol or drugs	1	2	3	4
People begging in public spaces	1	2	3	4
People sleeping rough in public spaces / in vehicles	1	2	3	4
Racism or discrimination towards particular groups of people	1	2	3	4

TRANSPORT

Now we will ask you some questions about public transport.

Q12 In the last 12 months, how often have you used public transport in Auckland? For public transport, please include trains, buses (including school buses), ferries, and cable cars. Taxis / Uber and hire scooters (e.g. Lime scooters) are not included as public transport. If your usage changes on a weekly basis, please provide an average.

Please select **one** answer

At least weekly	1
At least once a month but not weekly	2
Less often than once a month	3
Did not use over the past 12 months	4
Not applicable / not available in Auckland	5

5 → Skip to Q14

Q13 Thinking about public transport in Auckland, based on your experiences or perceptions, do you agree or disagree with the following. Public transport is... Please select **one** answer for each aspect

	Strongly disagree	Disagree	Neither	Agree	Strongly agree	Don't know
Affordable	1	2	3	4	5	6
Safe, from crime or harassment	1	2	3	4	5	6
Safe, from catching COVID-19 and other illnesses	1	2	3	4	5	6
Easy to get to	1	2	3	4	5	6
Frequent (comes often)	1	2	3	4	5	6
Reliable (comes on time)	1	2	3	4	5	6

Q14 Thinking about transport in Auckland, how much do you agree or disagree with the following statements? Please select **one** answer for each statement

	Strongly disagree	Disagree	Neither	Agree	Strongly agree	Don't know
It's easy for me to get to the places I need to go without the use of a private vehicle (e.g. car, ute, van, motorbike, etc.)	1	2	3	4	5	6
Public transport is a practical alternative to driving for the trips I usually need to make	1	2	3	4	5	6
The bike network in my local area is safe (e.g. separated cycle lanes, shared walking and cycling paths, painted cycle lanes)	1	2	3	4	5	6

COUNCIL DECISION MAKING

Now some questions about your opinions towards your local or regional council.

Q15 How much do you agree or disagree with the following statement? Overall, I have confidence that Auckland Council makes decisions that are in the best interests of my city.

Please select **one** answer

Strongly disagree	1
Disagree	2
Neither agree nor disagree	3
Agree	4
Strongly agree	5
Don't know	6

Q16 Overall, how much influence do you feel the public has on the decisions Auckland Council makes?

Would you say the public has... Please select **one** answer

No influence	1
Small influence	2
Some influence	3
Large influence	4
Don't know	5

A little worried	2
Worried	3
Very worried	4

DEMOGRAPHICS

Lastly, a few questions about you. This is so we can ensure we hear from a diverse range of people who live in Aotearoa New Zealand. Just a reminder that everything you share with us is confidential.

D7 Were you born in New Zealand?

Please select **one** answer

Yes	1	Skip to Q39
No	2	

D8 How many years have you lived in Aotearoa New Zealand?

Please select **one** answer

Less than 1 year	1
1 year to just under 2 years	2
2 years to just under 5 years	3
5 years to just under 10 years	4
10 years or more	5

Next, we have some additional questions about your gender and sexual identity. It is important for us to collect this information to make sure we are hearing from a wide range of New Zealanders. There are 'prefer not to say' options available if you don't want to answer.

D5 Do you consider yourself to be transgender?

Please select **one** answer

Yes	1
No	2
I don't know	3
Prefer not to say	4

D6 Which of the following options best describes how you think about yourself...

Please select **one** answer

Heterosexual or straight	1
Gay or lesbian	2
Bisexual	3
Other (please specify) _____	96
I don't know	97
Prefer not to say	98

D9 Are you descended from Māori (that is, did you have a Māori birth parent, grandparent, or great-grandparent, etc.)?

Please select **one** answer

Yes	1	
No	2	Skip to QD12
I don't know	98	

D10 Do you know the name(s) of your iwi (tribe or tribes)? If you answer 'yes' to this question, you will be able to select your iwi from a list or type in your iwi name(s). Answer 'yes' even if you know only know some of your iwi.

Please select **one** answer

Yes	1	
No	2	Skip to QD12

D11 What is the name and home area, rohe or region of your iwi?

Please select **all** that apply

Te Tai Tokerau/Tāmaki-Makaurau (Northland/Auckland) Region Iwi	1	
Hauraki (Coromandel) Region Iwi	2	
Waikato/Te Rohe Pōtae (Waikato/King Country) Region Iwi	3	
Te Arawa/Taupō (Rotorua/Taupō) Region Iwi	4	
Tauranga Moana/Mātaatua (Bay of Plenty) Region Iwi	5	
Te Tai Rāwhiti (East Coast) Region Iwi	6	
Te Matau-a-Māui/Wairarapa (Hawke's Bay/Wairarapa) Region Iwi	7	
Taranaki Region Iwi	8	
Whanganui/Rangitikei (Wanganui/Rangitikei) Region Iwi	9	
Manawatū/Horowhenua/Te Whanganui-a-Tara (Manawatū/Horowhenua/Wellington) Region Iwi	10	
Te Waipounamu/Wharekauri (South Island/Chatham Islands) Region	11	
Other (please specify) _____	96	
I don't know	98	Skip to D12

APPENDIX 3: CHANGES OVER TIME

These tables show results for selected questions included in the 2020, 2022 and 2024 Quality of Life surveys.

Table 1: Quality of life

	2020 (n=2532) %	2022 (n=2611) %	2024 (n=2524) %
Good	87	82	75
Poor	3	5	8

Source: Would you say that your overall quality of life is...
(1 – Extremely poor, 2 – Very poor, 3 – Poor, 4 – Neither poor nor good, 5 – Good, 6 – Very good, 7 – Extremely good)
In this table: Good = rating of 5, 6, or 7, Poor = rating of 1 or 2.

Table 3: Perception of local area as a great place to live

	2020 (n=2523) %	2022 (n=2588) %	2024 (n=2524) %
Agree	81	75	72
Disagree	9	9	9

Source: How much do you agree or disagree with the following statement?
My local area is a great place to live
(1 – Strongly disagree, 2 – Disagree, 3 – Neither agree nor disagree, 4 – Agree, 5 – Strongly agree)
In this table: Agree = rating of 4 or 5, Disagree = rating of 1 or 2.

Table 2: Quality of life compared to 12 months earlier

	2020 (n=2463) %	2022 (n=2571) %	2024 (n=2524) %
Increased	21	17	25
Decreased	31	39	30

Source: Compared to 12 months ago would you say that your quality of life has... (1 – Decreased significantly, 2 – Decreased to some extent, 3 – Stayed about the same, 4 – Increased to some extent, 5 – Increased significantly)
In this table: Increased = rating of 4 or 5, Decreased = rating of 1 or 2.

Table 4: Perception of local area compared to 12 months earlier

	2020 (n=2523) %	2022 (n=2588) %	2024 (n=2524) %
Better	20	12	15
Worse	23	40	33

Source: In the last 12 months, do you feel your local area has become ... (1 – Much worse, 2 – Worse, 3 – Stayed the same, 4 – Slightly better, 5 – Much better)
In this table: Better = rating of 4 or 5, Worse = rating of 1 or 2.

Table 5: Perception of current housing situation
% strongly agree or agree

	2020 (n=2483-2526) %	2022 (n=2606-2610) %	2024 (n=2524) %
General area or neighbourhood suits the needs of everyone in the household	82	77	73
Home you live in suits the needs of everyone in the household	77	74	72
Housing costs are affordable (rent, mortgage, rates, house insurance and maintenance)	44	34	31

Source: This question is about the home you live in. How much do you agree or disagree that ...
(1 – Strongly disagree, 2 – Disagree, 3 – Neither agree nor disagree, 4 – Agree, 5 – Strongly agree)

In this table: Agree = rating of 4 or 5.

Table 6: Perception of issues in local area

% who view as a bit of a problem or a big problem in previous 12 months

	2020 (n=2517-2520) %	2022 (n=2602-2609) %	2024 (n=2524) %
Traffic congestion	79	79	81
Limited parking in local area	51	55	51
Vandalism such as graffiti or tagging	43	61	58
Theft and burglary (e.g. car, house etc.)	55	70	67
Dangerous driving including drink driving and speeding	59	66	64
Air pollution	28	31	43
Water pollution including pollution in streams, rivers, lakes and in the sea	46	55	55

Source: To what extent, if at all, has each of the following been an issue in your local area in the last 12 months?
(1 – A big problem, 2 – A bit of a problem, 3 – Not a problem, 4 – Don't know)

In this table: Rating of 1 or 2.

Table 7: Perception of social issues in local area

% who view as a bit of a issue or a big issue in previous 12 months *

	2020 (n=2517-2520) %	2022 (n=2602-2609) %	2024 (n=2524) %
People you feel unsafe around because of their behaviours, attitude or appearance	38	47	56
Alcohol or drug problems or anti-social behaviour associated with the use of alcohol or drugs	44	52	59
People begging in public spaces	43	52	59
People sleeping rough in public spaces/ in vehicles	40	47	52
Racism or discrimination towards particular of groups of people	43	45	45

Source: To what extent, if at all, has each of the following been an issue in your local area in the last 12 months? (1 – A big issue, 2 – A bit of an issue, 3 – Not an issue, 4 –Don’t know)

*Note: The 2020 and 2022 survey asked Auckland respondents to rate these issues as either a big problem, a bit of a problem, not a problem at all or don’t know. The scale changed in 2024 and asked them to consider how much of an issue they felt each had been. In addition there were slight question wording changes in 2024 from references to people sleeping rough and begging ‘on the street’ to ‘public spaces’.

Table 8: Perception of sense of community

% who agree or strongly agree

	2020 (n=2525) %	2022 (n=2444) %	2024 (n=2454) %
It’s important to feel a sense of community with people in my neighbourhood	70	71	61
I feel a sense of community with people in my neighbourhood	50	47	42

Source: How much do you agree or disagree that ... (1 – Strongly disagree, 2 – Disagree, 3 – Neither agree nor disagree, 4 – Agree, 5 – Strongly agree)

In this table: Agree = rating of 4 or 5.

Table 9: Satisfaction with work life balance

% who agree or strongly agree

	2020 (n=1729) %	2022 (n=2609) %	2024 (n=1678) %
Satisfied	57	43	58
Dissatisfied	24	20	22

Source: Overall how satisfied or dissatisfied are you with the balance between your paid work and other aspects of your life such as time with your family or for leisure? (1 – Not applicable, not in paid work, 2 – Very dissatisfied, 3 – Dissatisfied, 4 – Neither satisfied or dissatisfied, 5 – Satisfied, 6- Very satisfied)

In this table: Satisfied = rating of 5 or 6, Dissatisfied = rating of 2 or 3.

Base: All respondents who were in paid employment.

Table 11: Income adequacy to meet everyday needs

	2020 (n=2433) %	2022 (n=2444) %	2024 (n=2524) %
Enough	45	43	33
Do not have enough	17	18	22

Source: Which of the following best describes how well your total income (from all sources) meets your everyday needs for things such as accommodation, food, clothing and other necessities? (1 – Have more than enough money, 2 – Have enough money, 3 – Have just enough money, 4 – Do not have enough money, 5 – Prefer not to say)

In this table: Enough = rating of 1 or 2, Do not have enough = rating of 4.

Table 10: Perception of public transport

% who agree or strongly agree

	2020 (n=2363- 2369) %	2022 (n=2444) %	2024 (n=2453) %
Easy to get to	64	58	50
Frequent (comes often)	55	46	43
Affordable	43	33	34
Reliable (comes on time)	49	39	33

Source: Thinking about public transport in Auckland, based on your experiences or perceptions, do you agree or disagree with the following. Public transport is ...

Base: All respondents (excluding not answered and those who stated the question was not applicable because they had no public transport in their local area).

Note: The 2020 and 2022 survey asked Auckland respondents to consider public transport 'in their local area', while the 2024 survey asked them to consider public transport 'in Auckland'.

Table 12: Perception of safety

% who felt very safe or fairly safe in each situation

	2020 %	2022 %	2024 (n=2524) %
In their city centre during the day	90	80	77
In their city centre after dark	48	37	33

Source: In general, how safe or unsafe would you feel in the following situations? ... (1 – Very unsafe, 2 – A bit unsafe, 3 – Fairly safe, 4 – Very safe, 5 – Don't know/not applicable)

In this table: Rating of 3 or 4.

Note: People were also asked to tell us in their own words which area they regarded as their city centre.
